

MISSION CAPABILITIES

The extremely light weight of Skyhawk in relation to its capabilities gives it great utility as a means of either attack or defense. Its outstanding low-altitude maneuverability and its minimum requirement for take-off or landing runways make it equally useful operating from aircraft carriers or small, mountain-ringed airfields.

High Level Attack

Dive Bombing
Air-to-ground missiles

Low Level Attack

Can attack under radar screen
Conventional or atomic bombs
Loft bombing techniques
Does not require fighter escort
