CONDUCTORS TRAIN JOURNAL REPORTS

GUIDE TO PREPARATION OF FORMS:

CN 900-T02

CN 900-T50

FOREWORD

The purpose of this manual is to give a detailed description of data requirements when preparing:

Conductors Train Journal Report

Form 900-T02

Form 900-T50

As these documents are an important source of information for operating and planning statistics, it is essential that ACCURACY, LEGIBILITY, COMPLETENESS, and TIMELINESS are maintained to ensure a high degree of quality.

GENERAL DESCRIPTION

The Train Journal is intended for use by road crews as a Train Journal, or Train Journal and Switchlist, depending on need.

Two Train Journals have been designed -

- CN 900-T-02

- CN 900-T-50

When and how these Train Journals are to be used is contained in this book.

TRAIN IDENTIFICATION DATA

		900	D-T-02						
TRAIN 341	NO.	ORIGIN DATE 31	SECTION NO.	100 433	RNAL NO.		TA OR SA	TIME ORDERED	SHEET 1/5
		900)-T-50						
1841N NO. 341	ORIGI SATE			143215		TA OR BA	TIME ORDER	0 1	or 5

Before delivering the Conductors Train Journal Report to the Carload Centre, Conductor must ensure that all of the following fields are complete on all sheets.

Train No.

Train Number to be shown in heading.

Origin Date

Date (day only) on which train is scheduled to originate.

Section No.

Show "Section of Train".

Journal No.

Show Journal Number.

TA or SA

TA (Continuous Service) to be shown when train crew

ordered in turnaround service.

SA to be shown when train crew ordered in straight

away service.

Time Ordered

Show "Time Ordered" (for all trains).

Sheet of

Sheets to be numbered consecutively. It is the responsibility of the last conductor handling the train

to complete the sheet numbers.

DEPARTURE/ARRIVAL HEADING

GENERAL

Each conductor is required to enter <u>all</u> of the following information pertaining to the portion of his run:- (To be filled in on one page only.)

DEPARTURE

Station

Show station name.

Time

All times to be shown under the 24-hour time

code.

Sample:

5:00 AM would be 0500

7:15 PM would be 1915

Date

Date must be shown by the Month/Day/Year.

GENERAL	(Cont. 1d)	۱
Character in san	(00110 0)	١

ARRIVAL

Station Name

Show station name.

Time

All times to be shown under the 24-hour time code.

Sample:

5:00 AM would be 0500 7:15 PM would be 1915

(Work trains - show OFF-DUTY time)

Date

Date must be shown by the Month/Day/Year.

Train Miles

Each conductor will show <u>actual</u> mileage covering his portion of trip.

Conductor's Signature

After filling in heading to cover his portion of run, conductor must sign his name in this column.

BODY OF REPORT CN 900-T-02

(See opposite page)

Detailed description of data requirements and items of special interest when preparing the CONDUCTORS TRAIN JOURNAL REPORT.

NOTE: Check marks (v) may be used to show repetitive data. Do not use ditto marks.

Initial Car initials to be shown on top line only and

must be reported as shown in "List of Station Numbers and Junction Points - Form 963-B,

Section 102".

Number Enter as shown.

Car number must be shown on bottom line.

If passenger equipment and number is not avail-

able, enter car name.

L/E Show "L" for loads, "E" for empties.

Car Kind Not required

If "Unscheduled Lift", enter TARE weight of car

(in tons) on top line.

This information is secured from "Weight in Tons" column of waybill. (Tare weights are also listed

in Form 950-CN Freight Car Types).

Tons If "Unscheduled Lift" and car is loaded, enter on

bottom line NET tons (weight of contents) as shown

in "Weight in Tons" block of waybill.

BODY OF REPORT CN-900-T-02 Cont'd.

CN Destination For cars destined on line, show destination station number.

(Refer to Form CN 963B - "Station Names, Numbers

and Junction Points"). or

CN Junction For cars destined off line, show alphabetic OFF

JCT. designation from Form CN 963B, Section III, "Station Names, Numbers". E.g. "GULCP" - Guelph,

Ont. /CP.

For "LOADS" show waybill contents (e.g. Flour). Contents

For "EMPTIES" show clean or dirty. (If unknown or

leave blank).

Grade of Empty

TRAILERS and for CONTAINERS

In the "CONTENTS" column of the flat car, indicate the amount of trailers or containers on that car.

eg. 2 TR's (Trailers), 3 CO's (Containers)

DISABLED CARS

The initial and number of the disabled car must be shown in the "Contents" column of the car containing it.

Special Handling See page 16 for Instructions and Description of

Special Handling Codes.

Plate 'C' See page 17 for explanation of codes.

No entry required by Conductor on lifts.

B.O. (Bad Order) See page 18 for explanation of bad order codes.

Cars coded with an 'A' or 'L' are to be moved only by authority of the General Superintendent Transportation.

No entry required by conductor on lifts

Take From/ Show station number and track number where Stn. Track

car lifted. Enter on top line.

If lifted at interchange track, indicate junction station number and railway code as shown in Form 963B, Section 106, (e.g. 12670D - Windsor Jct. N.S., Dominion Atlantic Railway.)

NOTE: See page 19 for explanation of "SPINS" numbers.

BODY OF REPORT CN-900-T-02 Cont'd.

Time/Day

Show pick-up time and day for cars lifted between departure and arrival stations on bottom line.

All times are to be shown under the 24-hour time code.

SAMPLE: 5.00 AM would be 0500

7.15 PM would be 1915

Place At Track No.

Show track number where car left at on top line.

If for any reason car is setout at other than the track indicated on the journal, stroke through the preprinted Track Number and insert correct Track Number.

Show reason for charge in "Remarks" column.

NOTE: (1) See page 19 for explanation of "SPINS" numbers.

(ii) See page 21 for explanation of "TAG" numbers.

Time/Day

Show time and day cars are set-off or arrive at terminating station on bottom line.

All times are to be shown under the 24-hour time code.

SAMPLE: 5.00 AM would be 0500

7.15 PM would be 1915

Place At Station No.

Show station number where car left at.

If car setout at interchange track, indicate junction number and railway code as shown in Form 963B, Section 106. (e.g., 14930P - Woodstock, N.B. Canadian Pacific).

NOTE: Prior to submitting Train Journal to Carload Centre, the last Conductor must ensure that the "Place at Station No." column is completed for all cars arriving.

Remarks

If car setout "B.O." - BAD ORDER, indicate reason. (Wheels, Hot Box, etc.).

If unable to provide all the required data, state reason, e.g., "No Bill".

Miles

This column to be used by "Work Trains Only". Show Total miles for each car for the day.

LOCOMOTIVE RECORD

	UN	III		STATION	NUMBER		EWITCHING			MILES		
	INITIAL	NO NUMBER	TAKEN FROM	514	LEFT AT	-3HE	MINUTES	ANY	AND BY	BLING	HELPER	LIGHT
3649	2017		11110	1300	11504	1850		114				
	2017	1	11504	1905	11704	31		75				
7	2017	1	11704	2320	12900	0055		41				
	5540		12900	0230	14523	0220		125				

First conductor handling train will show the locomotive record to cover his portion of run, on the first line; second conductor on second line, etc. Statistics required must be compiled as follows:

Unit

Numbers of each unit to be shown in blocks under initials and number. Only show initials when units are other than CN.

When a unit is Bad Order or is inoperative and unable to be used for haulage purposes, same must be shown in body of report. Complete data is required, i.e. Initials, Number, Taken From, Place At, etc.

Station Number

Taken From and Left at stations to be shown by <u>numbers</u> as shown in Form 963-B "Station Names Numbers and Junction Points". Times and dates of departure and arrival to be shown in "Time-Date" column; "Time" on top line and "Date" on bottom line.

Switching Minutes

Switching time must be shown in minutes only (Does not apply to Work Trains).

Miles - With Train

The actual mileage covering the portion of each conductor's run.

With Cab Only

Miles to be shown in this column when operating with cab only.

Doubling

Mileage covering doubling on the run to be shown in this column.

Grade Helper

If assistance is required on a grade, the initials and number of unit assisting must be shown in unit column and number of miles assisted shown in "Grade Helper" column.

Light

Miles that units operate unattached to other equipment to be shown in this column

WORK TRAINS

Conductors in charge of work trains, including wrecking, are allowed to compile one Conductors Train Journal Report to cover their day's operation (i.e. from time ON DUTY to time OFF DUTY). Train would also be reported under one journal report number

"Train Miles" and "Locomotive Record" must show total accrued mileage.

BODY OF REPORT CN 900-T-50 (See opposite page)

General Description of Each Field in the Body of Report.

- NOTE: 1) The body of this report will be pre-printed; of the descriptions that follow, information which is to be entered manually or of special interest to conductor will be preceded with an asterisk (*).
 - 2) Conductors using Train Journal Report Form 900-T-50 must also complete Form 900-T-02 to record Train Data, unscheduled lifts enroute and Locomotive Record statistics.
 - Check marks (*) may be used to show repetitive data.
 Do not use ditto marks.

Initial Number Car initials will be shown on the top line. Car number will be shown on bottom line.

L/E

"L" for loads; "E" for empties.

Car Kind

Type of car.

Tons

If Empty Car - Tare* weight in tons
(* Weight of car)

If Loaded Car - Gross* weight in tons
(* Weight of car and contents)

CN Destination

Cars destined on line will show destination station number.

or

CN Junction

Cars destined off line, will show alphabetic OFF JCT. destination from Form 963B, Section III, "Station Names, Numbers." e.g., "GULCP" - Guelph, Ont./CP.

Contents

"Loads" will show waybill contents, e.g., flour.

or

Grade of Empty

"Empties" will show a 2-6 digit which describes the condition and characteristics of the car.

This is called the "Gradex" code.

BODY OF REPORT CN 900-T-50 Cont'd.

TRAILERS AND/OR CONTAINERS

The number of trailers or containers on the flat car, will be indicated in the "Contents" column.

DISABLED CARS

The initial and number of the disabled car will be shown in the "Contents" column of the car containing it.

* Special Handling

See page 16 for Instructions and Description of Special Handling Codes.

Plate 'C'

See page 17 for explanation of codes.

No entry required by Conductor on lifts.

* Take From/ Stn. Track

Show station number and track number where car lifted. Enter on top line.

If lifted at interchange track, indicate junction station number and railway code as shown in Form 963B, Section 106, (e.g. 12670D - Windsor Jct. N.S., Dominion Atlantic Railway.)

NOTE: See page 19 for explanation of "SPINS" numbers.

* Time/Day

Show pick-up time and day for cars lifted between departure and arrival stations on bottom line.

All times are to be shown under the 24-hour time code.

SAMPLE: 5.00 AM would be 0500

7.15 PM would be 1915

BODY OF REPORT CN 900-T-50 Cont'd.

* B.O. (Bad Order) See page 18 for explanation of bad order codes

Cars coded with an 'A' or 'L' are to be moved only by authority of the General Superintendent Transportation.

No entry required by Conductor on lifts

* Place At Track No. Show track number where car left at on top line.

If for any reason car is setout at other than the track indicated on the journal, stroke through the preprinted Track Number and insert correct Track Number.

Show reason for change in "Remarks" column.

NOTE: (i) See page 19 for explanation of "SPINS" numbers.

(ii) See page 21 for explanation of "TAG" numbers.

* Time/Day

Show time and day cars are set-off or arrive at terminating station on bottom line.

All times are to be shown under the 24-hour time code.

SAMPLE: 5.00 AM would be 0500

7.15 PM would be 1915

* Place At Station No. Show station number where car left at.

If car setout at interchange track, indicate junction number and railway code as shown in Form 963B, Section 106. (e.g., 14930P - Woodstock, N.B. Canadian Pacific).

NOTE: Prior to submitting Train Journal to Carload Centre, the last Conductor must ensure that the "Place at Station No." column is completed for all cars arriving.

BODY OF REPORT CN 900-T-50 Cont'd.

If car setout "B.O." - BAD ORDER, indicate reason. * Remarks (Wheels, Hot Box, etc.). If unable to provide all the required data, state reason, e.g., "No Bill". This column to be used by "Work Trains Only". Show Total miles for each car for the day. * Miles

EXHIBIT 2

REPORTING FROM: POINT OF BREAKDOWN TO DESTINATION

RAILINER REPORTING

When a railiner breakdown occurs, the Train Journal for the railiner move to the breakdown point must be <u>closed-out</u>. (See Ex. 1 opposite page).

If a locomotive unit hauling conventional equipment is dispatched <u>from any</u> location to the point of the railiner breakdown, a new Conductors Train Journal Report must be compiled and closed out at point of breakdown.

An entirely new Conductors Train Journal Report must be compiled for the train movement from the point of breakdown to the final destination. (See Ex. 2 opposite page).

NOTE:- Locomotive hauled railiners and/or conventional passenger equipment is to be shown in the "body" of the Train Journal Report.

If a "Light-Unit" is dispatched from any location to the point of the break-down, a Train Journal is NOT required for the Light-Unit move.

[#] Data which could be filled in by Conductor when preparing Form 900-T-50.

SPECIAL HANDLING

	CODE	DESCRIPTION
	CAN	Reject Car - Either Unsuitable Contents or Cancelled
	CRP	Caution - Residual Phosphorous
	DAN	Dangerous
**	DIM	Dimensional Load
	DLO	Dry Load Only (Empty Mechanical Refrigeration with Defective or Missing Refrigeration Unit).
	DNH .	Do Not Hump
*	FE	Front End Car (Next to Engine)
	H	Heating, Venting, icing instructions
	HTR	Heater(s) in Empty Car
	ICF	Empty Ice Car - Full Stage
	ICH	Empty Ice Car - Half Stage
	KMR	Keep Mechanical Refrigeration Running
	THA	High Value Load
	L	Livestock Last Loaded Data
	MIC	Messenger in Charge
	MRE	Mechanical Refrigeration
	PBC	Perishable in Box Car
	PFG	Poison Gas Flammable
X¥	POG	Poison Gas
	P	Pool Number
	RAM	Radio Active Material
	RE	Rear End Car (Handle Next to Caboose)
	REJ	Reject Car - Either placed Wrong Location or
	•••	Unfit for Loading
*	UOS	Unload from One Side
	<u>v</u>	Venting Instructions
	WIB	Weight on Track and Bridges (Highweight)
	XPL	Explosive
*		May also contain free form special handling in-
		structions or Car Distribution Instructions

^{*} Of interest to Conductors but not to be written in on lifts.

^{**} To be written in by Conductors on lifts.

x An extra line must be written on the journal for these cars showing the Placard Endorsement which appears near the car number on waybills or other covering documents.

PLATE 'C'

Three codes may appear on the Switch List - C, D and U.

- C indicates a Plate C car which is between 15'1" and 15'6" above top of rail (e.g. some of our paper cars). A Plate C car will have a letter C in a ten inch square stencilled beside the initials and number on the side of car.
- D indicates a car exceeding Plate C (higher than 15.6"). These cars have the words, "Exceeds Plate C" stencilled in a 13 inch circle beside the initials and number of the car. Empty tri and bi-level cars and high cube auto parts cars are good examples.
- means unknown the computer does not have the information on file.

These codes apply to the car only - they do not refer to the load.

C and D identifies cars which are higher than standard that could strike overhead canopies on stations, freight sheds or customers' sidings, or the occasional low bridge or tunnel.

Caution should be exercised when handling cars with C and D codes in areas where restricted overhead clearance exists.

BAD ORDER CODES

A - L - R -	Potential Safety Defect Shifted Load Normal Repair Track work of a less serious nature.
C -	Car is contaminated/requires washout.
N -	Car is to be renumbered.
S -	Repairs are deferred until car is unloaded.
T -	Car must be transhipped.
W -	Car must be Reweighed and Restencilled.
F -	Defective Mechanical Refrigeration Unit. Defective Intermodal Unit.
н -	Car is to go to CN Main Shop.
1-6 -	CN Main Shop codes.
7-9 -	Dismantle Codes.
U -	Shopping Underway.

a) Each customer or yard track (except bowl tracks in a hump yard) is assigned a "SPINS" number similar to the example shown below:

НО

12

06

Car Control Zone Track Number

Spot number which is optional If used it indicates a special spot on the track such as a warehouse door or unloading pit number.

b) Two spot numbers may appear:

HO120709

This indicates car may be placed anywhere between spot 07 and spot 09; that is spot 7, spot 8 or spot 9.

c) Double alphabetic characters may appear:

HO34CH

This identifies team track customers except for any spot beginning with an "X" which is used for special computer processing. <u>Double</u> alphabetic spot indicators are of no significance to yard and train crews and may be disregarded.

d) While spot numbers generally indicate a specific location on a track, numbers 90 through to 00 are reserved to identify special switching instructions:

Number

Switching Instruction

- 00 Car left on or to be left on the lead
- 90 Place cars any order
- 91 Place car at 1st special unloading area from North or East end of track

(d) Cont'd.

- 92 Place car at 2nd special unloading area from North or East end of track
- 93 For local application as required
- 94 For local application as required
- 95 Place car at open area where not possible to identify spot number.
- 96 Place car at storage area of track
- 97 Place car at Team Track area of track
- 98 Industry will furnish list
- 99 Place car at stop block

- a) To assist in train makeup of outbound or through traffic a three digit number may be used to identify such traffic. This is called a "Tag Number". Every major yard which originates or breaks up trains has its own unique Tagging Table. If tags are used at your yard consult your Yardmaster for an explanation.
- b) Tag Number 980 to 989 have special meaning and they may be used at any location where switching occurs. Their meaning is as follows:
