Wea. SUN. JAN. 1, 1899 Ther.

Rained nearly all day. A
bit & very disagreeable. New
Years in San Francisco.
I was the only one who
was remembered when I
went to the post office.
People have quieted down
from their last evenings
celebration. It was the mis-
erid gang & crowd I ever
saw. All at home today
resting and sobering up.
Stout steers with fat hams
and sausage & pigs from
the proliferation.

Wea. MONDAY 2 Ther.

Another holiday. All stars
opened. Balm of April in
forenoon, showers and
sunshine. Went to Cliff
in forenoon. Many there in
St. Louis bath. Sea running
high. Have been beating
downs off the coast some
time. Caught in rain on
way home. Turning cold
again. No more snow
here. Farmers jubilant
over rains. Boy still at
the wash machine.

W arm sunny. Went out with Billy. W on Rob. Hill. Fine view storm had cleared atmosphere. The many palaces there but does not seem to be any great amount of happiness. Several are closed from death of the owners. Hopkins, Fair. Then Stanford etc. Wealth did not make them any too happy. Flood lower just turned over to Stanford Univ. for school of history.	Shawny. Went to Alameda and along heights. I a very pretty little spot among the hills. Climbed the hills to the quarries and crossed the first range of hills. A hard climb through the brush. Saw a fine flock of Cal. quail. Cattle feeding on dry grass in quite clear. Cattle are pasturing the valley towards San Jose. Smoke rising over trees. I and pairs looked on sharp view beyond.	W. Rain again. Winter rains set in for good and were happy. Mornings usually foggy. Burns off by some winter rain sets in. A curious kind of winter. Getting warmer than in November. So out for short walks but very frequently caught by bad weather. Went over to the Hermitage & followed road some distance over the hills beyond town to about	W. Took long walk from Frisco over the hills. passed again Miller's place, over the range to the valleys beyond. Came on rain & had a wet tramp. Rpt. on to Haywards, a good sixteen miles from the start. Was not through. Reached Haywards late after dark. Calm. Wined by electric car. Reached Frisco by 9 pm. not visible and muddy.

Rained nearly all day. At home most of time. Not as home even as expected. Managed to get out for a short time in p.m. Got very wetted from rain & cold. Had another crystal but in chimney glass cracked just one in but in. Boys not home in evening. Guess they had good luck at the races. Hope so. Saw Herman the master human man, then him at small. He was not changed in appearance.

Out sea, July 26/99.
 Small running pack sail well
 all day on trough.
 At 4:30 pm a ship appeared
 dead ahead, at 4:45 we saw
 opposite me another ship
 proved to be the "Portland"
 of the A.C. Co. four days
 back from Truk, for St.
 Michael. The manner of
 meeting of the two ships
 illustrated beautifully the
 description given by W.H.
 Seward in his "Travels
 Around the World", except
 we saw screw ships
 instead of paddle wheel.
 The word the last sign
 of human life we had
 seen since leaving the

 Sunday Chigah,
 Between 5 & 9 pm the
 storm clouds of the past
 two days suddenly cleared
 in the east and the full
 moon in all its glory
 burst out. The sea was
 rough and modern in
 picture. I in a short time
 the stars came out &
 added their beauty. All
 was on deck to see it
 without their welcome
 after the long hours of
 thick & murky weather.
 The wind keeps up and I
 fear the sudden clear
 means more of it to-
 morrow.
