

Friends of Auburn Heights Marshall Aerial Photos by Paul Nelson

Slides were scanned September 5, 2022 by Robert E. Wilhelm, Jr using a Minolta Dimage Scan-Dual III (AF-28340) and VueScan 9 (Version 9.7.91) Professional Scanning Software from Hamrick Software (<https://www.hamrick.com>). Default settings were used with the software set to 'slides'.

The slides are Anscochrome color, a cheaper quality competitor of Kodak. The film could be personally processed although as these slides are marked Anscochrome, they most likely received manufacturer processing. The individual slides were blown off before being placed in the slide holder for scanning. Scratches and other defects were noted on the original slide material. No post scan processing has been done to the slide images. They are red shifted due to dye deterioration due to age.

Following is information written on the individual slides.

1. Marshallton, Del – Looking east
2. H.B. DuPont Covered Bridge below Ashland
