

"Locomobile"

7 East 42d St., N. Y.

Style No. 02

We have discontinued our pictorial advertisements this month in order to announce certain improvements and changes in the present models of "LOCOMOBILES."

We also desire to announce that we have moved our Executive Offices from No. 11 Broadway, New York, to the Transit Building, No. 7 East 42d Street, New York. We are occupying the entire 9th and 10th floors of this building, and will be pleased to show visitors the different styles of "Locomobiles." One of our Storage Stations is conveniently located at No. 56 West 43d Street, where "Locomobiles" are always ready for demonstration on the road.

.....

SOME OF THE IMPROVEMENTS NOW BEING ATTACHED TO "LOCOMOBILES."

Enclosed Compensating Gear.

Enlarged Water Tank.

Spring Coil Piping.

Extra Large Cylinder Oil Cup.

Feed Water Heater.

(This gives a great saving of fuel and water, and makes the carriage steam in a remarkable manner.)

Gasolene Shut off Valve from the Seat
