## INSIST ON HARRIS OIL

---

---

# THAT'S WHY IT SELLS

---

HARRIS LIGHT OIL adapted to CLOSE FITTING lubricating surfaces. Light amber color possessing excellent lubricating body combined with a strong cold test.

HARRIS MEDIUM OIL has the greatest use on account of its adaptability to the majority of WATER-COOLED MOTORS, high fire test and durability so far as mileage is concerned, yet cylinder and spark plug are free from soot.

HARRIS HEAVY OIL, high fire test, more body. An aid to hold compression when piston is loose fitted or worn. Recommended for AIR-COOLED MOTORS, MOTOR CYCLES, OR MOTOR BOAT USE.

HARRIS SUPERHEAT STEAM CYLINDER OIL, high fire test, durable cylinder lubricant, used by the STANLEY MOTOR CARRIAGE CO. and recommended to all their agents and patrons.

HARRIS TRANS-COMPOUND for use in transmissions. Forms a friction-reducing film over all contact surfaces. In light and dark colors. We urge the dark.

HARRIS MOTOR GREASE for the compression cups and bearings.

HARRIS GRAPHITE GREASE most desirable for chains and gears.

---

## MEETS ALL REQUIREMENTS
