## Services Held for Former Student

Carl Kahalewai, former student of Kamehameha and a graduate of McKinley High school and brother of Kamehameha's well-known Samuel Keliikoa Kaina Kahalewai Jr., died at 6:40 p.m. Saturday, on board the U. S. Coast Guard cutter, Roger B. Taney, which was enroute to Honolulu. Carl's death was due to a ruptured appendix which caused peritonitis.

Carl was one of the equatorial colonists, stationed on Jarvis island. Word reached Honolulu Tuesday morning from Jarvis that Carl was ill. The Taney rushed to Jarvis immediately after receiving the call. He was picked up at 7 a.m. Friday by Dr. J. H. Wolfe, territorial public health physician, and Dr. D. W. Patrick, local physician.

Upon the arrival of the Taney on Friday, Carl was reported to be in a greatly improved condition and an operation was not necessary.

Late Saturday afternoon his condition was reported to be worse and at 6:40 p.m. death occurred.

He was very popular among the boys who knew him. At Kamehameha, he was in the class of '38. He did not complete his studies at Kamehameha but continued on to McKinley. At McKinley he was cadet colonel and held many important positions while there. He is survived by a father, Samuel Kahalewai, Samuel Jr., and five cousins.

Funeral services were held at Nuuanu funeral parlors Wednesday afternoon at 4 p.m. Cremation followed and the ashes were buried in the family plot in Kawaihao cemetery.

## Prominent Figure At K.S.B. Injured; Slips From Table

"Yoshi," a prominent figure in the infirmary of the Kamehameha School for Boys, or otherwise known as Mrs. Tomi Yoshioka, received an injury of two fractured ribs while working in the linen room of the infirmary.

Yoshi, well known by the boys for her service in mending their clothing and her hearty greeting whenever one visits the infirmary, accidentally slipped from the table that she was standing on and fell on the left side of her back.

"Why do you boys continually listen to those awful programs on the radio," pops up Miss Agnes M. Chambers, in a disgusted tone to her "stomach ache" patients. "I just hate those groaning programs," continued Miss Chambers, "they just give me the creeps." Suddenly Miss Chambers' left her fingers glued to the typewriter as she saw Yoshi opening the door, her head hanging down to the floor, and she said, "Me hurt, Miss Chambers, I fall down in room."

Yoshi has worked in the infirmary for the past 15 years. She served the faculty for three years before as a house maid. She is 62 years old. She still recalls her memories of the days when she used to visit the Kamehameha dairy (now the print shop).

## Noted Tennis Instructor To Tutor Faculty Netsters

Eight faculty members of the Kamehameha Schools and two outside members will have the opportunity for securing a series of group tennis lessons.

The course will be eight to ten lessons, and includes instruction in all the basic strokes and strategy. The cost for the series of lessons is \$3.00 per person. The class started on Thursday, October 13.

## John Simonson Receives Letter For Work

## Welfare Drive Successful at Kamehameha

**Girls' School Total Over-  
comes School for Boys'  
Donation; Surplus \$21.29**

Flash! Bing! The Welfare thermometer at K. S. G. has been broken! The 100 degrees thermometer was not sufficient, 30 more degrees being required, for the students at K. S. G. have given \$64.85 to the Welfare fund. This was 30 per cent more than their set goal which was \$50.

"This unusually large amount of money was attained only through the combined efforts of the Forum club, its various publicity enterprises, and through the unselfish giving on the part of every student," said Henrietta Cooper, chairman of the drive.

The amount contributed for the year 1938 is approximately three times as much as that contributed in 1934, \$21.57 being given in that year.

In 1935 the students gave \$6.11 more than the previous year, bringing the total of that year, 1935, to \$27.68. In 1936 the amount was nearly doubled compared to that of 1935. However, the total sum collected in 1937, \$35.00, was less than that received in 1936.

For the year 1938 the students decided that they would set \$50 as their goal. The Forum club sponsored campaigns; and pep talks were given. The seniors joined into the spirit and announced that 10 per cent of the proceeds received from their football hop would be given to the Welfare fund.

"The students," said Miss Cooper, "should be congratulated, this being their most successful Welfare drive."

**BOYS DONATE \$43.56**

Ending the Welfare drive successfully, the student body of the boys' school contributed \$43.56, which is \$9.56 more than last year.

The twelfth grade contributed the most, giving \$10.00.

Some of the part-timers gave their Welfare contribution to the company where they are employed. This was not recorded as part of the school contribution.

Gottlieb Coleman, ninth grader, was the chairman of the Welfare committee with Mr. Church as adviser.

The contributions of the classes are as follows: Twelfth, \$10; high-eleventh, \$5; low-eleventh, \$6; tenth, \$7.61; ninth, \$6.80; eighth, \$2.75; and seventh, \$5.40.

She has just received a letter from the bureau accepting the play and expressing interest in any further material which may come out of the social science studies work at the girls' school.

"The girls feel very much honored at having their play accepted by the Federal Theatre Project," said Henrietta Cooper.

## 'Athlete's Foot' Prominent Among Male Population

**By Ralph Miller**

Ninety per cent of male college students and 50 per cent of general adults have "athlete's foot." As elsewhere, many boys of this school have suffered at some time from athlete's foot.

Athlete's foot is scientifically known as trichophytosis. In fact it has some 12 different aliases.

The disease is caused by a fungus which gets deep under the skin and is very hard to kill. The parasite can live on silk, cotton, leather or wood, resists drying for a long time and is killed by boiling only after 15 minutes. If conditions are unfavorable to its growth it forms spores (a resting stage of the organism which protects itself by a thick and resistant wall). It may live on golf clubs, door knobs, towels, bath mats, and floors of pools and shower rooms. Feet when overheated may be attacked easily. Commonest form is slight peeling of skin between toes or about the nails.

To ward off an attack wash the feet daily with hot water and soap and dry thoroughly using a clean towel. Always wear slippers. Paint feet with one-quarter strength solution of iodine to help cure attack. Salt water and sunlight sometimes cure.

Shoes should be disinfected by pouring a small amount of diluted formalin solution in each shoe and allowing it to wet all the inside surface of the shoe, or wipe out the shoe with a cloth wet with formaldehyde or with two per cent alcoholic solution of thymol. Shoes should be thoroughly dried and aired before wearing again.

Treatment should continue for some time after visible irritation has disappeared. Guard against reinfection. Spores will likely develop and there will be a reappearance of the eruption.
