

Direct Air Route To Australia Held Necessary

Island Survey Work Finished, Itasca Returns

Data Available to Any Company Planning Service

While the proposed airway route between Honolulu and Australia will be at first via New Zealand after stops at Pago Pago and Brisbane, Australia, will be demanded by Australians to their mail service in the hands of William Miller of the Bureau of Navigation, department of commerce, who returned to the U. S. Coast Guard Cutter Itasca yesterday after a two month expedition to South Sea islands.

A group of Kamehameha youths, who were collecting aerial data and weather information on Johnston and Howland Islands, also returned on the Itasca. There were 11 in the party. Miller said that his department has completed its work and "any American airways company interested in such a service can now proceed."

DATA COLLECTED
The youths who returned on the Itasca have been collecting data on the tiny islands for the past year. The original copy of their reports will be placed on file at the local U. S. weather bureau and will be available to any South Sea expedition. Miller said. Copies have also been sent to Washington where they will be available at the bureau of navigation. Miller's personal report will also be sent to Washington and a statement from the department may be expected within the next few days, he said, relative to the air route to Australia.

Kam Youths Return From South Seas Expedition

GATHERED AERO AND WEATHER DATA FOR GOVERNMENT.—The USCG Itasca returned from a two month's cruise through the South Seas and brought home these 21 Kamehameha youths who for the past year have been collecting ornamental data and weather information for the U. S. department of commerce, bureau of navigation, as well as specimens for the Bishop museum. All were in excellent health and spirits and declared they had thoroughly enjoyed the expedition. (Advertiser Photo)

doubtedly lie between Palmyra island and Kingsman's Reef, which is not far from there. They are roughly a thousand miles south of Honolulu.

ENTRANCE LACKING
"If Palmyra is chosen for a depot," he said, "it will be necessary to blast an entrance into the lagoon and also to deepen the lagoon itself for supply ships. Better landing facilities prevail at Kingsman's Reef but this is a barren atoll and will require considerable improvement before it can be inhabited. A radio station, supply depot and hotel will have to be erected at either of these spots. "The next stop on the route should be at Pago Pago, which has a well-protected harbor. We visited there for a month this trip and during that time I took occasion to visit Apia in British Samoa, on the USS Lark. "Apia harbor is not well-protected and is not available to large ships. I would not recommend it as an air depot. "Suva, Fiji, would be the next stop and from there to Auckland, N. Z., to connect with a British line to Sydney, although the direct route to Australia is from Suva to Brisbane over the same route followed by the late Kingford-Smith. While Australian laws at present prevent operation of foreign airplane companies into that country, I believe that eventually pressure will be brought to bear by residents themselves for a direct service instead of the round-about route across New Zealand."

MADE OBSERVATIONS
Among those who made the expedition on the Itasca was Lt. E. W. Stephens, aerologist at the Fleet Air base, Pearl Harbor. Lt. Stephens made daily upper-air observations during the Itasca's cruise, both south and north bound for 1,000 miles along the equator. This is the first time in history that such observations have been made south of the Hawaiian Islands.

Balloons equipped with recording instruments were sent aloft daily and Lt. Stephens was able to learn wind direction and velocity at altitudes averaging 10,000 feet. At Pago Pago he made a record at 17,000 feet. The daily logs of the Kamehameha youths stationed on the islands will be turned over to the Bishop museum. Miller told reporters. They contain much interesting information about bird life, shells and fish around the islands. Many fine collections of shells were obtained for the museum as well as other specimens. A call at Swain's island by two of the youths resulted in other interesting collections for the museum.

BOYS COMPLIMENTED
"I would like to take this opportunity," said Miller, "to compliment the boys for the fine work they did during the past year. They gathered much valuable information. Although isolated for long periods, their morale and spirit were excellent. They showed no sickness. In fact, I think they returned in better health than when they left here. "The boys themselves all declared they had enjoyed the experience but were naturally glad to be home again. "Those in the party were: Henry Aha, Daniel Toomey, Jacob Hall, Kenneth Bell, Wm. Yonno, Henry Maniaku, A. Piianaia, Wm. H. Kaina, Archie Kauhakua, H. Hooper, Joseph Kim, Wm. J. C. Kanukui, J. C. Opiopio, Jos. Anakale, Folinia Faufata, Alex. Kahapea, Henry Ohimuki, Solomon Kalama, J. Carroll, G. Kahana. Besides Miller and Lt. Stephens, others who made the Itasca trip were: Lt. Comdr. L. Herndon, Lt. (Jg) R. H. J. Conn, Lt. R. W. D. Wood, USN, and Major Clayton Miller, who are identified with service aviation. Miller said he would remain here for about three weeks winding up details of the expedition. He then expects to go to the Orient but will return to Washington in time to conduct a similar survey of trans-Atlantic conditions "where the next major commercial route will be established."

Itasca Lands Food On Isle

Coast Guard Vessel Aids Hurricane Victims

(Continued from Page 1)
After visiting the three islands mentioned, the Itasca put into Swain's island on her way to Pago Pago. American Samoa. Swain's line 200 miles North of Pago Pago, and at the island two Kamehameha youths, A. Piianaia and K. Opiopio, were left to collect data and specimens for the Bishop museum. Swain's is owned and managed by a man named Jennings. It is a copra, banana and breadfruit trading post in the South Seas and is visited only irregularly by trading schooners. The Itasca then went on to Pago Pago where she remained a month before putting back to Baker, Howland and Jarvis. It was while on her way back that a severe hurricane occurred, the Itasca catching the tail-end of it at sea. Wireless reports to her, however, reported about \$50,000 damage to property in Samoa. It was then that the Itasca made for Swain's island, where extensive damage had also occurred and the residents were found to be almost without food supplies, since they grow most of their own. The Itasca promptly put ashore about 1,000 pounds of foodstuffs, took aboard the two youths who had been left there and after visiting the other islands where additional youths were picked up, headed for home. Swain's island has a population of about 175, mostly natives from the Cook group, who were brought there to work copra. The Kam boys managed to collect many interesting souvenirs for the museum. They also made a study of the natives which will be submitted to the museum.

Deadline Set This Saturday For Dog Show

Entries for the Hawaiian Kennel club's all-breed dog show which will be held at the Army March 28 and 29 will close Saturday, and all nominations of dogs must be in the hands of Er Crane, secretary of the club, not later than midnight of that day. Crane announced yesterday. Entries may be mailed in Box 3183, but must reach the committee not later than Saturday midnight. Entry blanks may be obtained from Arthur Zane, Capitol Market, any of the local pet hospitals, or from Crane through Box 3183, Honolulu. An important meeting of entry committees members appointed recently for the various breeds will be held tomorrow night at Room 412, Hawaiian Trust building. All interested are asked to attend.

Wong Wing Awana Dies; Rites Today

Wong Wing Awana, 1020 South Queen street, retired coffee planter, died at his home at 4:45 a. m. yesterday after a short illness. Heart trouble was the cause of death. Funeral services will be held at 10 a. m. today at the Nuuanu Funeral parlors, where the body has been on view since 6 p. m. yesterday. Burial will take place in the Manoa Chinese cemetery. Awana was born in China and was 36 years old, coming to Hawaii 28 years ago. He was engaged in coffee culture in the Islands for several years, and retired from active work in 1905. A widower, Awana is survived by a daughter, Mrs. Agnes Keawe, four sons, Benedict Ahina, David Aukai, Clement Aho and John Akana Awana; 21 grandchildren, and two great-grandchildren.

Woman Pleads Guilty To Fraud

Ex-Waiohinu Postmistress Faces Charge
Mrs. Juliette Apiki, formerly in charge of the post office at Waiohinu, Kauai island of Hawaii, pleaded guilty in the federal court yesterday to an indictment which charged her with having padded her payroll. It was understood yesterday that the woman has refunded to the government the amount of money she received illegally. She has been represented by Attorney Earl R. McGhee, former deputy attorney-general of Hawaii. Judge Huber continued the imposition of sentence to 2 p. m. next Monday. One liquor and two narcotic cases were disposed of by Judge Huber, with the kokua of William C. Moore, chief assistant district attorney, as follows: Sun Hen Wong, liquor, \$100 fine and six months' imprisonment in the city jail. Execution of the jail sentence was suspended, however, and Wong was placed on probation for five years. Park Chee Sun, narcotic, one year and a day in the penitentiary. Lee Kook Sun, similarly charged, one year and a day in the penitentiary. Costs were remitted in these cases. **NEW LITERATURE CLASS**
The first class in children's literature, conducted by Helen C. Twitchell, Punahou elementary school teacher, will be held this afternoon at Hawaii hall, University of Hawaii campus. Registration may be made through the executive division. Guests are invited to attend the first meeting.

Kamehameha Boys' School Moves To Camp For Week

A new departure in island education is being carried out by the Kamehameha school for boys, the experiment to end tomorrow. The entire school has been taken out to Camp Erdman, the YMCA camp at Mokuiaia, half of the student body spending four days at camp last week and the other half three days this week. At the camp regular school classes are held each morning, instructors holding their sessions in the craft shop and main hall at the camp. **100 GO TO CAMP**
Transported by school buses, 100 boys went to the camp last week under the leadership of Claude Banning, and 60 went out Sunday in charge of Charles Parent, both of the faculty. Donald Mitchell had charge of the camp programs for both sessions. In addition to routine school work instructors have taken their classes out to the woods and fields for studies in botany and other sciences. Alfred Church, social science instructor, led his classes in a survey of the Waiahua Community association program. **FIRST AID TAUGHT**
After the morning classes the first aid is devoted to instruction in day, swimming and sports and in the evening campfire sessions are held. "So far," said Homer F. Barnes, school principal, "the experiment seems to be a very successful one. The boys, of course, are very enthusiastic, and all are in favor of making it an annual program. We shall not decide upon that, however, until we have given results of the experiment more careful study."

Flare Causes Queries

A red flare in the sky, caused by burning of rubbish by city-courtesy workers near Kapolani park early last night, prompted several persons to call The Advertiser and the police and fire departments to inquire whereabouts of the blaze.

Across 2000 miles of sea to sunny Hawaii...Schenley's CREAM OF KENTUCKY Kentucky straight whiskey travels! For everywhere folks have found this is the whiskey that makes their drinks as luscious as the famous ones they mix down in Dixie!
