Administered by Interagency Archeological Services--Atlanta.				
16. Abstract (Limit: 200 words)				
A summary of the archeology and history of Loxahatchee National Wildlife Refuge and surrounding region based upon a literature search is provided. Systematic survey of areas projected to be affected by construction and development through Fiscal Year 1980 indicated no impact on cultural resources. No sites are recorded on the Refuge, nor were any discovered during the survey. This result is in agreement with what is known about development of the Refuge landscape within the past 5,000 years. No recommendations are made for management of cultural resources.
