## Report on School Beautification April-1958

Committee, Francis D Tracy Chairman
Mrs Harry Smith, Mrs Blanch Sturdevant, Mrs Geo. Myers, Mrs #
Mrs Raymond Miller.

Mrs Miller, Mrs Smith and Mrs Tracy met at Brooks Nursery 4-3rd and transported 75 Purple Bouganvillae to School also purchased soil. and sheep manure.

Mrs Smith, Mrs Sturdevant and Mrs Myers joined Mrs Tracy at 1 P.M. on school grounds where Mr Alden Perrine had sent his colored man to help by opening the cans and by three thirty all plants were set, fertelized and waters.

Having no rain plants were thoroughly water three times since then and are in excellent shape.

On March 31st we had hired a man to dig the 75 holes for plants, four feet apart and 4 ft from drive as this was too haavy work for the ladies.

We also purchased 10 ft of fifteen inch fencing to protect the Monstera deliciosa , planted last summer given us by Spice Garden .

Therere are six extra Bouganvillae to be planted in front of Cafatorium, this week.

Mrs Kirtley the Tres .gave me a check for \$60.00 the amt. voted for this work, membrandum is attached.

One days work by James Johnson LO.00 10 # Peat Moss 1.00 25. Dos Vigero 2.06 100 # Sheep Manure 4.85 @ 50 75 Bouganvillae Plants 37.50 100 # Top soil 50 10ft Flower Guard 1.45 \$60.00 \$57.36 Bal. on ha This will be used for spray material \$ 2.64

Francis W. Fraey-Clis,

Report to Upper Keys Garden Club on plantings at Coral Shores School Sept. 1958

Purchased from Newcombs Nursery Sept 4th 9 Plants

\$14.00

## Newcombs Donation from Mary Pereze

I Mango

1 Avacado

1 Carambola

1 Barbadoes Cherry

1 Egg Fruit (Canistel)

1 Loquot

1 Guava , Hibred Supreme, large fruit

1 Guava , Red Cattley or Strawberry .

1 Star Apple

These all Grafted two yr plants .

Donations from Mary Pareze

1 Lime Tree

1 Tree Hibiscus

Labor planting , cleaning and fertelizing Sept 6th by James Johnson

Fertelizer

\$10.00 2.04 26.045

James donated a Bambox Tree, and this was planted in front yard as was the Tree Hibiscus, and replants of two Royal Poincianas broken off, one Bouganvillia, poor shape replaced,

Original trees in rear yard

1 Sour Sop

1 Sugar Apple

1 Governers Plum

1 Barbadoes Cherry, total 14 trees

Mrs. Alida Tja

## AGRICULTURAL EXPERIMENT STATIONS

## UNIVERSITY OF FLORIDA

SUB-TROPICAL EXPERIMENT STATION

August 28, 1958

ROUTE 2, BOX 508 HOMESTEAD, FLORIDA

Mrs. Alida Tjader Upper Keys Garden Club Box 441 Islamorada, Fla.

Dear Mrs. Tjader:

I think your Garden Club has a very good idea in planting fruit trees at the Coral Shores School. They will be useful in landscaping but also they will furnish fruit which the children can eat. In this respect, I should think that you would want to plant a number of Barbados cherry bushes—they will not only be very useful in landscaping (and they grow well on the Keys) but also they will furnish fruit for the children to eat—fruit which is very high in vitamin C. I would definitely NOT plant an akee tree—the fruit is poisonous when unopen and the black seeds are poisonous at all times. The fruits are attractive and the children will be tempted to eat the fruits. So DO NOT PLANT THE AKEE!

If you wish to purchase the fruit plants and want good varieties that are grafted or produced by cuttings or airlayers, I suggest Newcomb Nursery on Redland Road between Avocado and Biscayne Drives. Mr. Newcomb has propagated good varieties of guava, mango, avocado, Barbados cherry, loquat, and other fruit plants. Besides, he has more or less made a specialty of studying the plants that do good on the Keys and can recommend the best species and varieties. I am enclosing a copy of the 1956 catalogue.

This Station usually has a number of fruit plants on hand for distribution to interested cooperators. Right at the moment, however, we find ourselves rather in short supply. However, I think we could find a Jambolan plum, Star apple, strawberry or Cattley guava, and perhaps a few other plants. I am afraid that you would have to wait until October to get these plants as I will not be here in September. I would suggest first that you see what you can get from Mr. Newcomb and then later this fall or next spring we can furnish you with some fruit plants which you do not have.

R. Bruce Led

R. BRUCE LEDIN,

Associate Horticulturist.
