ALL OF THE ADVANTAGES OF THE
TUNABLE CONVERTER:

Tune The Band for real versatility.
 3 Gang tuning capacitor for performance.
 Smooth 6 to 1 reduction planetary tuning.
 Large calibrated dial for good band spread.
 Printed circuit board for dependability.
 On-Off switch changes from AM to VHF.
 Tuned output for sensitivity, selectivity, etc.
 American Made With American Parts.

ALL THESE FEATURES IN ONE CONVERTER PLUS FOR THE FIRST TIME —

Complete interchangability of the crystals! Just plug in the frequency crystal you want!
 Continuously tuned Antenna, RF, and Oscillator stage even in the crystal position! These stages peaked
 to ultimate performance by resonating these circuits for best sensitivity, selectivity, signal to noise,
 image rejection, etc. by the 3 gang tuning capacitor.

This means no technical knowledge needed to change crystal frequency—just plug in the desired crystal,
 and peak entire converter by tuning the tuning knob for maximum signal—even to the band edges!
 Crystal controlled to Tunable with the flip of the switch! Save crystals on these seldom listened to fre-
 quencies, or for just listening variety!

FET transistor oscillator in a unique new circuit making this all possible!
