

the ADIRONDACK GUIDE BOAT

The ADIRONDACK GUIDE-BOAT

Welcome! We design and manufacture what some believe to be the most beautiful and seaworthy boats in the world. Whether loaded for family camping or edging up the starting line of a race, our boats are light and seaworthy, elegant and fast.

Our 12' Kevlar PackBoat weighs 44 lbs (+/-). Our 15' Kevlar Guideboat weighs 63 lbs (+/-) and our 15' cedar, pine, spruce, cherry and ash guideboat weighs 70 lbs (+/-).

Our boats love salt water or fresh, flat water or water with some muscle to it. Tom Peters, author of *In Search of Excellence* wrote in *Forbes Magazine* that, for him, "the opportunity to think, the opportunity to be fully human, happens in a Steve Kaulback Adirondack Guideboat."

Yachting Magazine has recently done a small article on us, as have *Vermont Magazine* and *Northern Woodlands Magazine*. Last year *Vermont Public Television* ran 3 segments on our boats and *Vermont Public Radio* aired a commentary entitled, "A Stradivarius of a Boat Built by North Country Carpenters"... "When you see the real thing, there's no question in your mind about it. The reaction is visceral, as well as aesthetic-like coming upon an exceptionally beautiful woman, listening to Mozart perfectly played or casting a dry fly to a large native trout."

Our boats range in price from very expensive to not-so-bad. We ship pretty much anywhere. Shop visits and demo rides are always available.
