Factory Options

Consult your Albin Dealer for complete details on available factory-installed options.

Construction

At Albin, we use the best available materials for the construction of our ocean-going vessels.

Deck Hardware is through-bolted using aluminum backing plates. Hull-to-deck joint is through-bolted and backed, chemically bonded and sealed using "5200" adhesive.

We construct our boats using a combination of bi-axial & uni-directional FRP knitted products. All through-hull areas have solid reinforcement to prevent damage to the Hull / Deck Laminates.

By the use of these construction techniques, coupled with superior hull and interior designs, we enjoy the enviable reputation of fine sea-keeping qualities, comfortable and practical interiors with economy in use.
