THE CANOE OF THE AMERICAN INDIAN

DID you ever think that of all the primitive implements of the Indian none for water use has survived civilization in a recognizable form except his canoe? The test of time and the ingenuity of the white man have found nothing of comparable size superior to his model of a water craft, be it for pleasure or for service on stream, river, lake or ocean bay. Until, however, there was substituted cotton duck or canvas for his birch-bark covering, the use of canoes was restricted to those localities where the materials could be easily obtained, and where there were Indian workmen to apply them. Improvisation of a better covering and improvement in methods of construction now provide the canvas-covered canoe, but fundamentally in lines and model the water craft of the red man survives.

It is the adaptability of the canoe which makes it so universally needed, and for some purposes, like cruising in the far reaches of our north country, no other craft can be used. Best of all, the canoe furnishes means of enjoying that waterway or body of water which lies nearest each of us, and whether it be lake or pond, stream, river or bay, the pleasure of water travel is not denied. An afternoon's paddle can take one far from the toils and turmoil of the town, and affords association

with nature than which nothing is more conducive to quiet thoughts, a happy mind, a good appetite and resultant red corpuscles. He who ever on a summer's night has dipped his paddle and pushed far out under the still moonlight to drift in the full freedom of quiet and appreciation of nature's composure, realizes that the canoe is the tangible cause for all his wonder and delight, and the charm of canoeing once partaken of holds its victim enthralled ever afterwards. It is in cruising, however, that the canoeist reaches the height of his hopes; and to follow the ways traversed by the native red man a century and more back, to live by a camp-fire as he lived, and to make shelter wherever night overtakes, is to understand the independence of the savage and know the truth of self-reliance.

As this modern canoe had its origin in the haunts of the "OLD TOWN INDIANS" it is appropriate that it should be named "OLD TOWN CANOE." These same Indians still retain their cleverness in canoe building and the number of them in our employ seems to give to our canoes something of the old Indian romance as felt by Hiawatha in the lines by Longfellow:

"I a light canoe will build me,
 That will float upon the water,
 Like a yellow leaf in Autumn,
 Like a yellow water lily."

The "birch bark" (canoe), like the tomahawk and wigwam is now scarcely known except in Indian tradition and museums, but the "OLD TOWN CANOE" will perpetuate gratitude to the Indian for his invention of this typically American water craft. The simplicity of an Indian's life is visualized to us when we understand how easy it is to own and maintain a canoe.

To learn to paddle is as easy as to learn to row, and the extreme simplicity in the means of guiding and propelling a canoe is what has made its use so popular and widespread. If you spend your summer near the water and have not experienced the exhilaration of canoeing, you have a joy to look forward to. This year you can double the charm of your outing and make an inseparable, ever-ready and inexpensive companion by acquiring an "OLD TOWN CANOE."

GRADES of "Old Town Canoes and Boats"

"OLD TOWN CANOES AND BOATS" (except all wood boats) are made in two grades, known as "A. A." and "C. S.", the distinction between the two being in the selection of materials, the wood trimming and the finish. There is also a difference in price.

A. A. GRADE

This grade provides a mahogany trimmed canoe. In designating A. A. Grade the purchaser assures himself of our very best production. All materials are of the highest order procurable. Planking and ribs are carefully selected, of uniform color, and without any imperfections; gunwales, decks, thwarts and seat frames and seats are of straight-grained, selected mahogany; bang plates of brass, and fastenings throughout of copper and brass, — a very few necessary galvanized nails are used in gunwales and stems to hold ribs and planking.

Every detail in the matching of woods and in finish is accomplished with painstaking care to the end that the completed product will permit of no adverse criticism. This grade will satisfy the most exacting.

C. S. GRADE

This grade provides a hardwood and spruce trimmed canoe of thorough construction, good finish, and with the omission of no detail essential to strength, serviceableness and long wear. No shaky or unsound lumber is used, but the wood parts are subject to slight discolorations, small knots, etc. Planking and ribs are of cedar; gunwales of spruce; decks, thwarts and seat frames of oak, birch or ash (boat seats of spruce); bang plates of brass, and fastenings throughout of brass, copper and galvanized iron. Canvas of the same quality as in A. A. Grade, filled and waterproofed in the same manner.

For general use where superior finish is not desired C. S. Grade provides a common-sense canoe of guaranteed dependability.

This father and son team up well in an "Old Town Canoe"

SPECIFICATIONS of "Old Town Canoes"

RIBS

Of white cedar, the toughest light weight wood obtainable, 5/16 inch thick, 2 inches wide spaced 1 1/2 inches apart. Ends tapered.

PLANKING

Of finest quality straight-grained red cedar 5/32 inch thick. Smooth laid in long lengths with tight joints.

OPEN GUNWALES

All canoes and boats are stocked with newest type of open gunwales, which make washing out easier.

DECKS

Sixteen inches long except "Otca" model (page 5). Longer decks supplied to order (page 37).

STEMS

Ash or oak, straight grained.

SEATS AND THWARTS

Seats have wood frames with cane filling. Bow seat dropped on 4-inch bolts. Stern seat and thwarts bolted close to gunwales. Thwarts located and spaced as shown in illustrations of each model. No middle thwart

in 16 foot canoes but furnished without extra charge if specified when order is placed. Seats and thwarts easily removable.

KEEL

On all stock models except those shown otherwise on pages 9 and 10. Depth of keel 7/8 inch. It runs full length of canoe and well under bang plates.

CANVAS

No. 8 seamless canvas on all "OLD TOWN CANOES" except the "50-pound" (page 10) has No. 10 to provide lightness. Be cautious about buying a 16 foot or longer canoe which hasn't No. 8 canvas on it. Boats, dingies and outboard motor craft beginning page 14 have No. 6 canvas, also Guides' Special Model page 9.

FILLER

The canvas is made waterproof and smooth, with all trace of texture removed by a hard-drying, flint-like filler.

FINISH

The woodwork inside and outside is finished in natural wood color with three coats of waterproof varnish. The canvas is finished to an enamel-like surface of high gloss with waterproof varnish. Variety in color with name, striping and similar decorations is available. See page 37 for particulars.

"Old Town 'OTCA MODEL' Canoe"

A real Penobscot Indian Pageant in "Old Town Canoes"

The "Otca" model is the widest, deepest and roomiest. These features make it the steadiest, safest and most capacious canoe that we build. The floor is flat and wide, and carried far into the ends. The sides are convex, thus producing a handsome tumble-home. The 20" long decks with low coaming or deck-end finish are practical, pleasing and distinctive. This model is not designed primarily for speed but for comfort, safety and fine appearance.

It is the sort of canoe one always takes pride in owning because of its true lines and details of fine craftsmanship. Equally at home on stream, lake or ocean, it never fails to give its owner and occupants a feeling of complete canoe joy.

The model is suited for use under any conditions anywhere. It paddles easily, will carry the largest load comfortably, can handle a maximum sail area. Illustrated with floor rack which is included in price of A. A. Grade but is \$2.00 extra in C. S. Grade. Extras page 37. Stock Color Dark Green. Other colors, etc., pages 37 and following.

In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.

"Old Town 'H. W. MODEL' Canoe"

The boys are taking the picture

Instead of having a perfectly flat floor the H. W. Model tends toward the shape of the well-known salt water yawl boat below the water line. This shape gives more draft and hence greater steadiness in windy waters. It is a general utility model, somewhat faster under the paddle than the Otca Model, sturdy and handsome in appearance—the kind of canoe that is always ready for any use.

Extra fullness at bow and stern enables this model to ride over large waves instead of cutting through them as in the case of a canoe with sharp ends. For cruising, carrying heavy loads, for use on large rivers, lakes, ponds and salt water, this is an excellent canoe. The lines are speedy and graceful and the ends curve with that nicety given by the Indians to their bark canoes. It's a good sailer.

This H. W. Model has all the essentials in lines and quality to make any owner proud of his possession. All parts are shaped for lightness coupled with ample allowance for strength. There is no excess weight. Hunters and others who have portaging to do will appreciate this. Extras page 37. Stock Color Dark Green. Other colors, etc., pages 37 and following.

Length Extreme	Width Extreme	Depth Amidships	Approx. Weight	Approx. Weight Packed	For export (see note p. 32)		A. A. Grade (see p. 3) with keel		C. S. Grade (see p. 3) with keel

In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.

"Old Town 'SPONSON' Canoe"

If you keep away from the water because of distrust of the ordinary rowboat or canoe, try this canoe. Boys and men, because of its safety, use it even more readily than the regular canoe. Girls' summer camps have scores of them. It is named "Sponson" from the air chambers built out each side and extending from stem to stern. Amidships the sponsons are 4" wide, 5" deep. This ample size doubles the air space and buoyancy as compared with

smaller designs. They add about 25 lbs. in weight. They are clear of the water and touch the water only when the canoe is careened.

Stock Color Dark Green. Extras page 37. Stock Sponson Canoes built on H. W. Model. Sponsons built to order (three weeks) on any models for \$18.00, except 20 ft. canoe (page 9) cost is \$22.00. Rowlocks can be added for use separately or at the same time with paddles. Rowing equipment page 34.

In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.

"Old Town '50-LB. MODEL' Canoe"

The 15 foot length is a canoe of exceptional capacity, not burdensome in portaging and capable of carrying one man and much equipment or two men with reasonable equipment. On preceding page is picture portraying loading capacity of this model. It is used by timber cruisers, fire wardens, hunters and sportsmen and as a general purpose canoe by young and old alike. Extra light construction is employed. Ribs are 1/4" thick, spaced 1 1/2" apart, planking 1/8" thick, canvas No. 10. All lengths have middle carrying thwart and seats as illustrated. The 11 foot and 13 foot lengths are limited in stability and capacity by their shortness but broad beam carried full into the ends gives unusual steadiness.

These canoes are the shortest and lightest for strapping to an automobile. Stock Color Dark Green. Other colors, see pages 37 and following. Extras page 37. A few users prefer keel omitted. (Allow 10 days. No change in price.) This 15 foot model with keel is a prime favorite with Boy Scouts, and for them usually thwarts are supplied in place of seats (no extra charge).

A lightweight "Old Town" makes portaging easier

In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.

"Old Town 'YANKEE MODEL' Canoe"

A beautiful water scene with an "Old Town" for the centerpiece

Steadiness comes nearly as much from length as from width. Consequently the regular seventeen and eighteen footers are steadier than the regular sixteen footers. To meet the demand for a sixteen foot canoe with as near as possible the stability of the longer canoes this wide "Yankee" model was designed. We recommend it to those who let canoes, and prefer the sixteen foot length, because it is so broad it can be entrusted to those who are not accustomed to handling water craft. Its popularity is widespread and many old experienced canoeists are numbered among its friends.

It will behave admirably and vie with any canoe in beauty. Is an excellent fishing canoe and for carrying large loads where a short length canoe is desired.

Extras page 37. Stock Color Dark Green.

"Old Town"

SAILING EQUIPMENT

This outfit is adaptable to any canoe or rowboat. Consists of Lateen sail, completely rigged with mast and booms and tackle for hoisting and lowering. Mast Seat (illustrated page 37) and Step for supporting mast, and Leeboards which serve same purpose as centerboard. Each leeboard blade is fastened by pivot bolt, with tension lever nut, to heavy Manganese bronze angle bracket, which in turn is screwed to cross arm. The cross arm is adjustable to varying locations in the canoe or to canoes of different beams and is securely held to the gunwales by hook bolts with thumb nuts. The entire

outfit can be installed instantly and when not in use can be taken apart and stored in the canoe.

The blades swing on the pivot bolts like pendulums, and enough tension should be put on the lever nuts to hold blades perpendicularly but permit of their swinging up if obstruction is encountered under water. All metal parts brass or bronze.

Steering may be done with rudder as illustrated or with regular paddle. Prices quoted on other types and sizes of sails if description and measurements are given. Any items sold separately at the prices shown.

Mast Seat and Step installed in place of bow seat	\$3.00	Lateen Sail complete, area about 45 sq. ft.	\$18.00
Rudder complete with fastenings	5.00	Lateen Sail complete, area about 55 sq. ft.	21.00
Leeboards (same style fits both regular and sponson canoes)	9.50	Lateen Sail complete, area about 65 sq. ft.	25.00
Lateen Sail complete, area about 40 sq. ft. (Boy Scout size)	17.00	Lateen Sail complete, area about 75 sq. ft.	30.00

"Old Town 'WAR' Canoe"

Boys' and girls' summer camps and canoe clubs in general are hardly complete now without one or more war canoes. They are always available for groups to go off on picnics and excursions even of several days' duration. Nothing is better in training for teamwork or unity of action and nothing is prettier than the even, rhythmic sweep of a dozen or more paddlers driving a war canoe with lusty strokes at top speed.

War canoes executing formation (Luther Gulick Camps)

They are strongly braced, equipped with floor rack, keel and outside stems, 30 inch long decks, heavy spruce open gunwales, stern seat for coxswain, thwarts 4 inches wide, spaced 27 inches apart for paddlers. Canvas is No. 6.

This canoe is stocked in Dark Green Color. Other colors (page 31) like red, orange, yellow, etc., are also in great demand and any is available without extra cost except white which as usual on all canoes is \$5.00 additional. Special colors take about ten days, time. Stripes and color designs also are frequently supplied for which see page 37 and inside of back cover. These items for a 25 ft. War Canoe cost 50% more than for a regular canoe because of the additional work caused by the greater length of canoe. For prices of names see page 37.

Freight cost to points east of the Mississippi River and north of the Ohio River now is based on actual weight at the regular canoe freight rate. To more distant destinations the freight cost may be higher than the regular canoe rate and we will on request quote freight cost. To these destinations freight cost is lessened when several canoes are in the shipment.

SQUARE-END PADDLING CANOE

15' Square End Paddling Canoe

18' Square End Paddling Canoe, with Sponsons, Amidship Seat, and Rowlocks

There is a very definite demand from sportsmen and fishermen for a canoe which can be used with paddle or oars and motor. This model meets that need and hundreds of users are getting satisfaction from this all purpose craft. Shape and general dimensions follow the regular 20 ft. Guides Special canoe except the lengths are shorter, namely 15 ft. and 18 ft. and have square stern. Motors of 1.1 H.P. to 5 H.P. give five to ten miles an hour. Width of stern is 28 inches for 15 ft. and 24 inches for 18 ft.

Stock color Dark Green. Equipped with Half Ribs. No. 6 Canvas. Painter Ring.

The 18 ft. is pictured with sponsons (described page 7) which can be supplied on either length canoe at extra cost of \$18.00. Also it is pictured with stationary board rowing seat amidship costing \$3.00 additional and rowlocks costing \$3.00 additional. These items can be included or omitted in either length canoe. Oars priced page 34. Suggest 6½ ft. length. Prices below do not include sponsons or amidships seat or rowlocks.

"Old Town" CANVAS-COVERED DINGHY OR YACHT TENDER

This Dinghy (9 foot length illustrated above, with rope bumper, which costs extra, as below) is always watertight. Can be left on deck or hung from the davits for days without affecting its non-leak canvas covering. Will carry a large load, handle easily and tow well. It has the same style of construction as in our canoes, — cedar ribs and planking covered with heavy No. 6 canvas. Stern and transom built strong and modeled to carry outboard motor. All woodwork is finished natural color. Canvas is enameled Dark Green in stock but any color furnished in ten days. For white color (also in stock) add \$5.00.

Regular equipment includes two pairs polished brass rowlocks attached, seats, davit rings, towing ring and bilge keels. In A. A. Grade trimmings are of mahogany (see page 3). In C. S. Grade of hardwood and spruce. For oars see prices page 34. For cotton rope bumper in

groove in gunwales add \$8.00 for 7½ foot, 9 or 10 foot Dinghy, \$10.00 for 11½ foot Dinghy and \$12.00 for 14 foot Dinghy. See next page for some illustrations of Dinghies.

9' Dinghy with Outboard

10' Dinghy

14' Dinghy

"Old Town" SAILING DINGHIES

10ft. Sailing Dinghy

11 1/2 ft. Dinghy with 72 ft. sail

11 1/2 ft. Sailing Dinghy

These dinghies are illustrated completely equipped for sailing. The sails are easily removable and after furling will stow inside their respective dinghies. Equipped with rowlocks so are usable as rowboats. Sterns are strongly braced for outboard motors. Prices include centerboard (\$35.00), rudder with tiller (\$8.00), mast ring and step (\$3.00), 56 ft. area dinghy sail (\$25.00), wire side stays (\$10.00). Also 11 1/2 ft. has 24" mahogany deck (\$10.00). Do not recommend this deck for 10 ft. Prices include

foregoing items and white color and crating for shipment. Other colors no extra charge. All sailing items easily removable. Centerboard well does not interfere with seating. Roped gunwales priced page 15. Dagger type wood centerboard in 10 ft. dinghy—galvanized hinged centerboard in 11 1/2 ft. dinghy—as illustrated. A 72 ft. area sail for 11 1/2 ft. in place of 56 ft. area costs \$12.00 extra. All sails have reefing points for reducing areas.

"Old Town" CANVAS-COVERED, DOUBLE-END BOAT

Here are the good qualities of a wooden boat without the disadvantage of a wooden boat. There never is need of first swelling the wood to make the hull water-tight. The canvas covering of No. 6 canvas keeps out the water. The canoe style of construction with cedar ribs and planking makes for lightness. The width and flatness of floor assure steadiness. The depth gives ample capacity and freeboard. It's a good, practical, comfortable, family boat, steady and staunch. Sides braced to seats with natural knees.

more than fifty of these boats (and even more Old Town Canoes). For private camps too it is an ideal boat. It is light to handle and safe to use.

Paddles can be used as well as oars. The shallow draft offers exceedingly slight resistance to the water, making it an easy boat for women and children to handle. It's an ideal boat for fishing. Extras page 37. Stock Color Dark Green. Other colors, etc., see pages 37 and following. Oars and paddles, page 34.

All set to go

At the boys' and girls' summer camps operated by Mr. C. E. Cobb at Denmark, Maine, there is a growing fleet of

"Old Town" LAPSTRAKE BOATS

14 ft. Lapstrake Square Stern

14 ft. Lapstrake Rowboat

Here are shown two models of Lapstrake Cedar Boats—one designed for motors even up to 22 H.P., and the other for rowing but suitable also for small motors up to 5 H.P. Construction of each boat is in the highest possible grade. Measurements below will show difference in widths amidships and at sterns. These are beautifully built boats of surpassing quality and performance.

Planking is red cedar $\frac{1}{2}$ inch thick in narrow widths, brass fastened to ribs and frame of ash and oak. Gunwales,

seats and transom are mahogany. Entire boat is finished in natural wood with varnish. Equipped with floor boards, brass rowlocks and painter ring. For \$20.00 48 in. long mahogany deck as illus. page 25 may be added to Lapstrake Square Stern Boat. Also for \$12.00 the two amidship seats may be made 16 in. wide with folding mahogany back rests as in illustration page 27. Speeds for square stern boat range from 16 miles with a 10 H.P. motor up to 22 miles with a 17 H.P. motor.

In Writing Order Give Length and Model. Also Extras and Equipment.

"Old Town" ROUND-BOTTOM WOOD ROWBOAT

15 ft.

This is a rugged sturdy boat of a shape and construction which so many boat users like. Here are smooth lines for easy rowing and handling—roominess for comfort—ample depth and width for seaworthiness—and high grade workmanship for staunchness and beauty of appearance: Campers, cottage owners and fishermen like this boat for its all round usefulness. It rows easily. It is well balanced so that one, two, three or even four people can occupy the fifteen foot length, and up to three people the twelve footer. While designed for easy rowing the ample beam amidships, moderately flat floor and good width at stern enable use of outboard motors up to not exceeding 10 H.P.

Ribs are ash or oak to which is secured by brass screws the strip cedar planking of $\frac{3}{16}$ " thickness and $1\frac{3}{8}$ " width. Joints are laid in marine glue and the strips of planking are tightly compressed to eliminate leaking.

Rowlocks (two pairs) and all fastenings are galvanized iron except screws holding planking are brass as stated above. Open gunwales. Stock color usually white paint outside and gray paint inside. Your choice of plain solid colors can be furnished but would delay shipment about one week. Usually 7 ft. oars are supplied costing \$3.50 per pair in plain ash or spruce, and \$5.32 per pair in spruce, varnished, leathered and copper tipped.

Part of the fleet of over 200 of our 15 ft. Round Bottom Boats purchased for the Parks of the Commonwealth of Pennsylvania

In Writing Order Give Length and Model. Also Extras and Equipment.

"Old Town" FLAT-BOTTOM WOODEN BOAT

This is a well-modeled, inexpensive skiff or flat-bottomed boat, strongly made for rough, hard wear. It is very seaworthy. Just the right boat for fishing. Excellent for use at boys' and girls' camps and at sporting camps for general all-round use. Requires very little care. Sure to give you your money's worth if used only one season and would then probably cost you less than you could rent a boat for. With reasonable care will last for years. Stern built strong for use with outboard motor. Any number find this boat very speedy with all of the standard motors of 2 H.P. to 10 H.P. Built with open gunwales.

This boat, being all wood, is subject to drying out and shrinking when kept in dry storage for any length of time. When put into the water it may at first leak, but quickly the joints tighten and close up so that leaking then stops and the boat becomes perfectly dry. In this respect it differs from the canvas-covered boats which always are water-tight. It is built like all standard flat-bottom wood boats, but with much stronger cleated sides. For the

service intended and the price it suits hundreds of users. Fish well can be supplied under the middle seat for \$9.00 extra. Has removable slatted floor rack.

Built of white pine and red cedar, painted in various colors, usually Green outside, Gray or Brown inside, White gunwales, Mahogany-stained seats. Plain spruce or ash oars cost \$3.50 per pair for 7 foot or \$3.75 for 7½ foot. For finished oars see page 34. Round (ring) oar locks at no extra charge.

This is a load that any boat would envy

"Old Town" FLAT-BOTTOM WOODEN BOATS

10 ft.

12 ft.

These boats follow the same lines and construction as the 15 ft. on preceding page. The 12 ft. length easily operates with 2 H.P. to 5 H.P. motors. The 10 ft. boat is a Boy Scout Model, and materials (except paint) complete cut to shape in knocked down form with assembling plans can also be supplied—price \$30.00.

Construction, details, color, etc. same as for 15 ft. (page 21.) Standard open or round rowlocks on any boat. Plain ash or spruce oars cost \$3.25 for 6½ ft. and \$3.50 for 7 ft. For finished oars, see page 34.

In Writing Order Give Length. Also Extras and Equipment.

"Old Town" SQUARE STERN SPONSON MODEL

For an all-round general-purpose motor boat of the greatest possible safety and seaworthiness, this model has won the admiration of thousands of users. It has unusual capacity, as shown by the picnic load in the accompanying photograph. The sponsons or air chambers alongside provide an assurance of safety beyond what no water craft can contain without this feature. Canvas covered construction is ideally suited to boats in and out of water frequently as when used week ends at summer camps or transported by automobile from place to place. Canvas boats will never leak from such usage. The construction is rigid thruout. No vibration or shaking. Modified V-bottom. Speeds eight to seventeen miles with 2½ H. P. to 9 H. P. motors. Shallow draft. Very seaworthy. Handsome appearance.

Stock Color Dark Green. Other colors page 37. Price includes seats as illustrated, painter ring, tool drawer under stern seat, floor rack, outside stem and one pair brass rowlocks. High-grade spruce oars with leather

buttons to prevent oars from slipping thru rowlocks, priced on page 34. Waterproof canvas cover with auto curtain fasteners and bows (type illustrated page 25), \$18.00 for 16 ft., \$16.50 for 14 ft. Same model without sponsons on next page. See page 25 for illustration of 14 ft. and of 48 in. long deck. Shape of stern and complete outline same as small illustration next page (24).

In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.

"Old Town" SQUARE STERN MODEL

The omission of sponsons lessens the weight of this model (16 ft. illus.) as compared with the boat on the preceding page. This change gives advantages which some users like, and particularly there is increase in speed. An admirable, light-weight, always-tight boat for sportsmen, fishermen and general utility purposes. Fast enough with a light-weight motor and performs beautifully with 2½ to 9 H. P. motors. Speeds from eight to seventeen miles. It

responds instantaneously to the helm, is quick in getting under way, and travels without shake or vibration. Seats are braced to the gunwales with natural-grown knees securely held with screws and bolts. This makes the boat rigid in the extreme and assures long life. Construction follows our highest standard. Every detail is taken care of with a view to providing the utmost value for a fast, safe, dry boat at a reasonable price.

Stock Color Dark Green. Other colors page 37. Price includes seats as illustrated, painter ring, tool drawer under stern seat, floor rack, outside stem, and a pair of brass rowlocks. High-grade spruce oars with leather buttons to prevent oars from slipping through rowlocks, priced on page 34. Waterproof Canvas Covers and 48 inch Long Deck illustrated and priced on next page (25) where also are pictures of 12 ft. and 14 ft. Square Sterns.

In Writing Order, Give Length, Grade, Model, Color and Price. Also Extras and Equipment.

12 Ft. "Old Town" SQUARE STERN MODEL (A. A. Grade \$124.00; C. S. Grade \$114.00) is here shown. Complete specifications are on page 24. While short in length this boat is exceptionally steady and seaworthy because of the broad beam. It is built to fill the need so often expressed by sportsmen, fishermen and campers for a good short practical boat easy to handle in and out of the water and with an automobile, at the same time being safe and capacious and reasonably fast with motor or easy to row. A 3 H.P. to 5 H.P. motor will give up to eight miles with two people. Waterproof canvas cover \$15.00.

14 Ft. "Old Town" SQUARE STERN MODEL with 48 in. Long Deck. This deck adds \$20.00 to price of boat shown on preceding page, making cost complete with Deck in A. A. Grade \$146.00, in C. S. Grade \$136.00. Crated for shipment costs \$5.00 — crating necessary to protect Long Deck. Decks both practical and artistic—will hold weight of person. General information this model preceding page. Available with sponsons (page 23) and without Long Deck. Best for use with 4 H. P. to 10 H. P. motors but will perform beautifully with larger motors and is extremely fast. Waterproof canvas cover \$16.50. This Deck in 12 ft. and 16 ft. of this model at same price. This 14 ft. model or the 16 ft. model may be equipped with two Wide Seats and Folding Backs same style as in All Wood Sea Model (page 27) for \$12.00.

"WATERPROOF CANVAS COVER" on 16 ft. square stern sponson model. Wood bows strapped to cover and reaching across gunwales hold canvas in roof position. Lift-the-Dot fasteners and draw rope secure cover along sides. Price of cover for this 16 ft. model or 16 ft. Square Stern Model, \$18.00. Hood made on any cover to go over motor attached to stern increases cost \$3.00. In ordering give make and size of motor. Cover made of high grade, soft flexible material, khaki color.

"Old Town" LAPSTRAKE SAIL BOAT

Here is a boat to delight the heart of a sailor! It's a joy to watch it perform and still more of a joy to handle the helm. Hull has lines for speed and ample beam for stability. The sail area is properly sized for speed and easy handling. For the beginner or the seasoned sailor there is the same joy of possession as the ownership of a fine automobile.

Planking is 1/2" white pine laid in lapstrake construction and securely fastened to ash or oak ribs and frame.

All fastenings and fittings are brass. Centerboard is wood lowered and lifted with bronze friction lever—very easy to operate. Sail is Marconi type about 68 ft. area held to mast and boom with slides. Jib has about 22 ft. area. Total area about 90 ft. Height of mast 16 1/2 feet. Boat has 53 inch deck solidly built, also full length side decking and all covered with canvas finished in blue color. Exterior of hull finished white—interior painted light gray. Waterproof khaki canvas cover for cockpit costs \$11.00.

In Writing Order, Give Length, Model and Price.

"Old Town" ALL-WOOD SEA MODEL

This All-Wood Sea Model holds the forefront of popularity. Outstanding new features are refinement of detail and sturdier construction together with more ample measurements of width and depth. Its performance always draws praise. Flare to the bows keeps the boat dry. Seating arrangement is generous and comfortable.

The floor frame and transom are built extra heavy to stand the stress and power of the larger motors. Smooth

laid narrow $\frac{1}{16}$ " cedar planking is brass screw-fastened to oak and ash ribs. Deck, outwales, side decking and coaming are Philippine mahogany, likewise stern, hinged backs, and tool box seat. Interior finished natural with spar varnish. Planking outside painted White. Other colors if desired. Polished brass mooring bit and chocks and swivel rowlocks included in prices of boats.

Speed is a feature and following table gives estimate of speeds with two people aboard. Figures under H. P. show approximate miles per hour.

There are comfort, speed and safety in this 18 ft.

About a twenty mile clip in a 16 ft. All-Wood

Big enough for the whole family

Your camp at the lake needs a boat like this

14 Ft. ALL-WOOD SEA MODEL is here illustrated. Price with specifications and description of construction on page 27. The model is very wide as the picture clearly shows—55 inches. This wide beam enables it to carry a large load easily and to perform outstandingly with even the largest motors. Seats are placed low, as in all lengths, for stability and to allow for comfortable thick cushions. Cushions are shown on preceding page; also on page 35. Details of construction, colors and standard equipment are itemized on page 27 where also price is shown. A still broader boat in this same construction and similar lines is shown on page 30 under the name 16 ft. All-Wood Oceanboat.

The **ALL-WOOD SEA MODEL** and **OCEANBOAT** (Page 30) frequently are equipped with extras as shown in the above picture. With them nothing is left for the imagination to desire to make a boat complete in every detail except the motor. Size of motor will depend on the amount you wish to invest and the power you prefer. Estimated speeds which may assist in determining H.P. of motor appear on page 27. Prices opposite are based on the 18 ft. All Wood Sea Model. All items are likewise suitable for the 14 ft. length and 16 ft. length (except they have one tool box seat and so require only one cushion) and also the 16 ft. Oceanboat on following page. Battery (five dry cells or equivalent \$3.00) is not included with Electric Lights. We are always prepared to give information and prices about outboard motors suitable for the various boats. Also we stock motors for immediate shipments.

16 Ft. ALL-WOOD OCEANBOAT is an enlarged Sea Model. It has the same general appearance and identical details of construction of the All-Wood Sea Model but nine inches more beam and greater depth. There is a very large demand for a boat in 16 ft. length of unusual capaciousness and capable of carrying the largest motors under the extremest kind of unfavorable weather conditions. This boat as far as we know is the biggest 16 ft. boat in the market and is in a class by itself

for completeness, good looks and performance. The extra beam makes the boat come out of the water quicker and plane better with the larger motors. With a 17 H.P. motor boat will plane nicely at a speed of seventeen miles, with a 22 H.P. motor at about twenty-two miles and with a 33 H.P. motor at about thirty miles. Extra equipment at same prices as 16 ft. Sea Model (pages 27, 29 and below). Has two tool box seats at stern.

	Width Extreme	Depth Amidships	Width Stern	Length Deck	Approx. Weight	Approx. Weight Crated	Approx. Cubic Measurements	Price Crated	Code Word
16 ft. Oceanboat	60 in.	23 in.	56½ in.	72 in.	445 lbs.	725 lbs.	220 ft.	\$200.00	Oceat

WATERPROOF CANVAS COVER is here illustrated on a 16 ft. All-Wood Sea Model. Fabric is the highest grade material, soft and easy to fold and completely waterproof and mildew proof—color khaki. Lift-the-dot fasteners are spaced along the sides and at transom. In addition a cotton rope or puckering string permits of drawing the cover tightly down. Over mooring bit and chocks there are placed hinged canvas lids which snap down over anchor rope. Same kind of

cover is used on all Sea Models. Price for 14 ft. Boat, \$19.00; for 16 ft. Boat, \$20.00; for 18 ft. Boat, \$24.00; for Oceanboat, \$20.00. Hood can be built into cover to go over motor on stern for \$3.00 additional. Boat pictured above has white stripe at water line with Light Green above and Bright Red below on bottom. A very pleasing combination. No extra charge.

Road Companions all over New York, Ontario and New England

INFORMATION FOR ORDERING "OLD TOWN CANOES"

HOW TO PLACE ORDER

All canoes and boats are priced in plain single colors completely ready for use except for equipment. For colors see reference below, also page 37. For paddles and other equipment see page 34. For extras see page 37. In ordering be sure to give length, grade, model, color, price, also extras and equipment.

COLORS

Dark Green is the standard stock color and in this color we aim to be ready to ship any stock model canoe or boat on the day order reaches us. We intend also to carry a stock of canoes colored Light Green and Dark Red and a reasonable number in the various color designs. During rush season it is well to give second choice of color. Any special color (allow ten days) will be furnished to order, if sample of shade is supplied, at no extra charge except white, for which see page 37. The usual colors are shown in colored illustrations on inside back cover. For special decoration, striping, names, etc., see page 37.

SPECIAL CANOES

When canoes are wanted varying in width or depth from stock models it is necessary to build them as special orders, requiring about five weeks' time and extra cost. Our varied assortment of models provides a particular canoe for almost every use but we are glad to quote prices on special canoes on receipt of specifications.

TERMS

Remittance in full should accompany order in form of certified check, bank draft, express or post-office money order, payable to Old Town Canoe Co. Order with remittance should be addressed to us at Old Town, Maine, U. S. A. If less than the full amount accompanies order, the payment or deposit with order should be at least one quarter of the cost. The balance due us will then be collected after shipment by means of a bank draft with Bill of Lading attached in the case of freight shipments or by means of C.O.D. in the case of express and parcel post shipments. If shipment is to go under draft kindly give name of bank where you wish draft collected. The name of your bank is desired only for your convenience. We guarantee complete satisfaction and for our responsibility refer you to any bank.

INFORMATION FOR ORDERING "OLD TOWN CANOES"

PACKING AND SHIPPING

Prices quoted for canoes and boats include packing in loose hay and burlap or crating and delivering to the transportation company in Old Town. For crating, unless otherwise shown, there will be a reasonable charge based on actual labor and material. The usual cost of crating is \$5.00.

Shipments are generally made by freight. Express charges are three to four times as much as freight charges.

EXPORT

Almost invariably steamship lines require that canoes for export be crated. The charge for export crating is \$5.00 for each canoe. Frequently canoes for export can be crated in pairs with a reduction of about 40% in the cubic measurements of canoes crated singly.

DEALERS

In all cities and other canoeing centers representative dealers stock "OLD TOWN CANOES." You can place your order with your dealer and at the same prices as catalogued plus transportation charges. If you wish to know the name of our agent in your locality or the one nearest to you please write us for it. If there isn't an agent to supply you, send your order direct to us and get immediate shipment.

 Double Cushion, 14 x 14 in., 14 x 16 in., snap fastened 5.50
 Box Cushion, 14 x 14 in. 2.25
 Pillow Cushion, 15 x 15 in. 1.25

CUSHIONS are here pictured which we make for "Old Town Canoes and Boats" and for general use. Every Cushion passes the government test to qualify as a life preserver. All materials are new. The filling is new prime Java Kapoc and no adulterant of any kind is used. Waste wool, cotton, etc., may be used by some makers of cushions to gain weight, but such filling has no buoyancy nor is it resilient. Cushions are covered with new artificial leather in a variety of colors and patterns. Popular colors are, red, blue, brown, green and gray. Unless otherwise stipulated, cushions are supplied in color to match boat. Samples of fabrics will be sent on request (indicate color preferred). We cannot guarantee to duplicate colors and patterns as manufacturers are continually changing fabrics. Close matches are always possible. Above pictures show only the popular sizes and styles. We can always make to order and will gladly quote on special requirements. In ordering cushions to fit boat seats, give length and name of boat and length and width of seats.

PACK BASKET

Indian pattern hand made Pack Basket for hunters, fishermen, hikers. Made of selected pliable pounded ash strips. Readily moulds itself to back of carrier. Superior to canvas pack which always seems to shrink and sag. Web straps are easy on shoulders. Baskets weigh from 2 1/4 lbs. to 4 1/2 lbs. depending on size. Straps weigh 3/4 lb. Some prefer basket encased in waterproof khaki cloth covering which weighs about 1 lb.

	Regular Pack Basket	Covered Pack Basket
15" High	\$3.50	\$6.50
18" High	4.00	7.25
20" High	4.50	8.00
22" High	5.00	8.75

CARE AND REFINISHING OF CANOES AND BOATS

To insure continued good appearance of your canoe it should, whenever possible if not in use, be kept in a dry place under shelter. If left out of doors on shore place it bottom side up to keep out the rain and dampness. If water is allowed to stay unnecessarily long inside canoe when not in use there may result sweating and blistering of outside canoe finish.

To locate hidden leak in canvas pour considerable water inside canoe and watch for it to come thru. White lead, glue, or Ambroid Cement can be used to stop the leak.

Every season or two, depending on the service it has had, it should be refinished so as to afford protection to the canvas and woodwork from wear and exposure. A new coat of varnish will brighten it up and make it look like new. The same materials that we use, in quantities sufficient for one canoe, cost as below. Complete directions accompany materials. Should you wish advice as to care and maintenance or repair of your canoe we will gladly give you all the information we can.

FOR A. A. and C. S. GRADE CANOES AND BOATS

1 pt. Japan color coat (except white) specify color (Exterior) . . . \$1.10
 1 pt. Special Spar Varnish (usually takes 2 pts.) (Exterior)75

PICTURES

A large number of "OLD TOWN" owners have sent us pictures of their canoes and boats in service, some of which are shown in this catalog. If you have been fortunate in getting some good pictures we should be very glad to receive copies to add to our collection.

A light weight motor saves time and muscle

Jiffy Outboard Motor Bracket for canoes \$5.00
 Will take any make motor

CARE OF ALL-WOOD BOATS

All-wood boats should not be stored in heated rooms. Heat causes wood to shrink. If heated rooms are unavoidable keep open pans or pails of water in the heated room or in the boat to keep the air moist. Each season new coatings of paint and varnish will probably be needed. Our standard refinishing materials sufficient for one boat cost as follows:

1 qt. Enamel Paint for wood boats, specify color \$2.00
 2 qts. Spar Varnish 3.00

NAMES, MONOGRAMS, STRIPINGS FOR CANOES

Shaded gold transfer letters 2½ inches high are regularly used for applying names to canoes. Generally the name is placed on both sides of bow or on left bow and right stern. Names also put on in colors in plain letters at same price per letter. Monogram of your description or to sketch in either gold or colors at costs shown below. Usually letters 4 inches high are used for monograms.

Quotations on special lettering furnished on receipt of designs or descriptions.

The embellishment of canoes by monograms, names,

Special color, except White	No charge	*Gold Stripe, ½ in. edged	\$6.00
*White color, enameled	\$5.00	*Gold Stripe, ½ in. turned down	6.00

*Special Lettering, 2 in. to 4 in. high, Gold or Color	2.00 to 4.00	*Color Stripe, ¼ in. to 4 in.	4.00
*Monogram, two or three letters, once	3.00	*Color Stripe, edged	5.00
*Monogram, two or three letters, twice	5.00	*Color Stripe, turned down, or border stripe	4.50
*Gold Stripe, ½ in.	5.00	*Color Stripe, turned down, edged	5.50

Items with this mark (*) involve special work requiring 6 to 12 days before shipment.

stripes, etc., is increasing in favor every season. It permits of giving your canoe a touch of individuality obtainable in no other way.

In the colored illustrations shown inside of back cover we have endeavored to help you find a coloring that you may like. The various designs permit of different coloring combinations adaptable to your preference. When colors vary from our standard shades in the illustrations we like to have samples sent for our guidance. Due time allowance should be given to execute these special colorings.

For illustrations see inside back cover. For war canoe (page 13) increase stripe price 50%.

EXTRAS for "Old Town Canoes"

Although each canoe as priced in this catalog is equipped with every necessary feature, there are extras in the way of additional parts which many canoeists desire. These extras are desirable because of the greater utility, distinctiveness

and beauty which they provide. In the following list you may find several items which you wish incorporated in your canoe. Where added time is required to supply any item it is noted by the mark (*) indicating six to ten days.
