BRITISH ANZANI

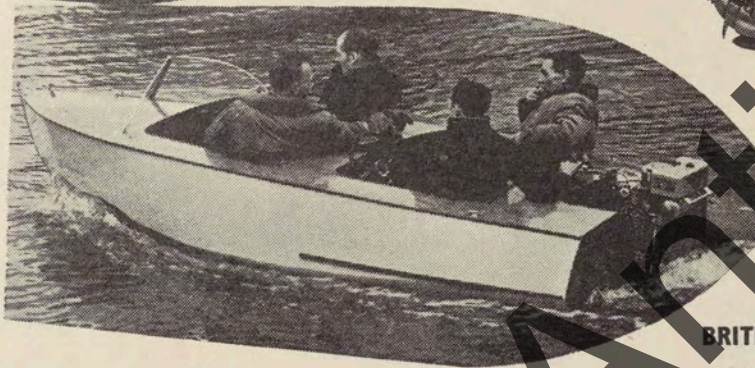

Super **OUTBOARDS**

Pick out the power for your craft from this purposeful range of no less than five spectacular British Anzani models. Designed to cover every boat-propulsion need and headed by far and away the most powerful British outboards—the 15 h.p. and 10 h.p. Unitwins, every British Anzani engine is precision made to the most advanced specification from the finest materials.

Expect incomparable performance from a compact British Anzani—faster starting, quicker response, smoother, vibrationless, silent running, more staying power and noticeably better economy.

British Anzani Motors are the first choice of outboard enthusiasts because more quality is built into a British Anzani, giving lasting value and dependable performance.

DESCRIBING:

BRITISH ANZANI OUTBOARD MOTORS

IMPORTED TO THE UNITED STATES BY DAMAC CORP.
ROSLYN, L.I., N.Y.

Anzani is an old and respected name in industry. They made the motor for the airplane Bleriot used in flying the English Channel in the year 1909. That engine was a reliable and robust unit, and Anzani motors are no less so now. They are designed for heavy service under adverse conditions; start easily and seemingly run forever with little attention. Anzani outboards are completely "Gadgetless" and are made of the finest materials by craftsmen who are proud of their work. When requiring service which is infrequent the average owner experiences little difficulty, as the motors are simple devices. If more complicated repairs are ever needed, the motor can be serviced by any good mechanic, for a simple tool kit is available with every motor. Factory service is available at Roslyn, L.I. if desired. However, the type of dealer we wish to join our rapidly growing group, will provide service and supply parts, for these parts are always available to dealers.

There is nothing fancy about these motors. They are all clean honest value, which any responsible dealer will be glad to offer his best customers.

Anzani motors stand up well in continuous salt water use. Our customers are enthusiastic about their operation, and praise them highly. We can think of no better recommendation.

The confidence of the manufacturer in his product is reflected in the one year guarantee which is extended to all owners.

Certified Horsepower!

The Motor Industry Research Association, an independent national authority, determines the horsepower ratings of British Anzani outboard motors.

Their tests are conducted with scientific apparatus and ordinary commercial fuel is used. All readings are taken at propeller shaft and the horsepower we claim is the honestly rated power output that you will get from a British Anzani motor on the stern of your boat.

The official test certificates record 7.54 b.h.p. for the "MINOR", 1.5 b.h.p. for the "PILOT", and 3.9 b.h.p. for the "SUPER SINGLE" model. The actual power curves are reproduced below.
