# Aero-Craft

20th ANNIVERSARY  
BOATS AND CANOES FOR '66

# Galaxy

(10)-21 Fiberglass

The Galaxy is the newest, the largest, the most seaworthy Aero-Craft yet to be built. One of the best deep-vee hulls ever to challenge the competition with an Aero-Craft pedigree that means tremendous rough water performance and dependability. The Galaxy is right at home on large lakes and coastal waters. Many, many fine features and bonus extras are included as Standard equipment. Test drive the Galaxy and discover a ride and maneuverability in rough water that is truly remarkable.

Oarlock sockets	Expanded foam flotation
COLORS: Custom Tan. Seaspray Green. Burgundy.	

## AERO-CRAFT'S TIME PROVEN, EXCLUSIVE STA-FOIL® DESIGN

Aero-Craft scored a smashing advance in aluminum canoe design. The most revolutionary new concept in canoe design since Hiawatha. The STA-FOIL® is a rib pressed into the side of the canoe during stretch forming operations. This STA-FOIL® adds tremendous strength and rigidity to both the side and bottom of the canoe.

Located just above the normal waterline, it has a definite sponson effect when the canoe is tipped in either direction, thus substantially increasing stability. The STA-FOIL® also decreases the amount of draft on the canoe which results in easier paddling and a pronounced increase in speed.

### HIGHLIGHTS OF AERO-CRAFT CANOES

- Heat treated aircraft aluminum, alloy 6061-T-4
- Heavier and stronger stem pieces, keels and gunwales.
- Additional cross members for added strength and greater rigidity.
- Expanded polystyrene flotation foam in excess of B.I.A. standards.
- Velon web seats for comfort, lower center of gravity and extreme strength.
- Brazier head rivets with over twice the holding power of counter sunk rivets.
- 5/32nd diameter rivets that are 50% stronger than 1/8th rivets. (see table at right)

Load, in pounds, required to produce failure of one rivet in single shear		
1/8" rivet - 61 S-T6	Used in other makes	389 lbs.
5/32" rivet - 61 S-T6	Used in Aero-Craft	596 lbs.
This table proves conclusively that 5/32" rivets have over 50% more strength than 1/8" rivets.		

#### C-13 Aluminum

Leading off the famous Aero-Craft canoe line is the model C-13. Handling and portaging come easy with this rugged new model that is ideal for fishing or hunting those inaccessible waters. Light, strong and durable with Aero-Craft quality throughout. Exclusive STA-FOIL® design.
