Johnson Disposable Diapers

Presents

"To Your Baby's Health"

A radio program that might save your baby's life.

From Johnson and Johnson, the Baby People.

"QUALITY OF LIFE"
IN THE
BLACK COMMUNITY

Current Problems*

1. Death rate for black babies is nearly twice that of the national average.
2. Maternal death rate is three times higher for blacks, than for the national average.
3. Pre-mature births for blacks are nearly twice that of the national average.
4. The life expectancy for blacks is about 10% shorter than that of the national average.

<u>Blacks</u>	<u>National Average</u>
64.6 yrs.	71.3 yrs.

A major reason for these statistics is that mothers and babies in the black community do not receive the proper medical care before and after birth that is so vital to survival and healthy development of infants.

What is "To Your Baby's Health"

Wm. C. Hill
9/30/71

"TO YOUR BABY'S HEALTH" is the title of a radio program, sponsored by JOHNSON'S Disposable Diapers, that will talk about how to give your baby a healthy start in life. "TO YOUR BABY'S HEALTH" will highlight the current problems in black baby care, and will seek to convince mothers and expectant mothers that to have a healthy baby, regular medical care is needed right from the time you become pregnant.

The program will feature people in the medical profession and other baby care experts discussing what you can do as parents to help protect your children. It will also tell you who to contact and where to go to help keep your baby healthy.

What Are The Objectives?

1. To make black mothers aware of the problems in baby care that are unique to the black community.
2. To direct mothers and expectant mothers to the services of existing health centers and patient clinics where they can receive the proper guidance and education during pregnancy and after birth.
3. To increase the chances of black babies to be born healthy and to remain healthy.

Why is Johnson and Johnson sponsoring it?

"As a world leader in health care, Johnson and Johnson has always been dedicated to improving infant and child health. Johnson and Johnson products have helped generations of parents to care for and protect their babies. Through this radio program, we hope to carry on our baby care ^{SHARE IMPORTANT FACTS} ~~tradition~~ ^{ABOUT YOUR BABY'S HEALTH} by sharing important facts on how to give your baby a healthy start-in-life."
