

Indian Hill Green Areas MAP

1. THE SYCAMORE CREEK AREA

The level ground at the junction of Sycamore Creek and the Little Miami River creates this ideal setting for the Accessible Walking Trail and Village Soccer Fields. Also located in this park setting are the Livingston Lodge* and the Outdoor Education Center*. (*Please obtain permission for use of these areas.)

2. STEER MEADOW

This beautiful field maintained as an open vista contains Bluebird boxes. A nice place to spend a quiet afternoon.

3. BONNELL PARK

The rolling field and wooded hillside were donated to the village for park land. The accompanying building is the home of the Indian Hill Historical Society. Beautiful foundation gardens and bluebirds may be seen here.

4. WHITACRE PARK

The successional field and wooded hills contain a rugged walking trail. The trail is approximately $\frac{3}{4}$ mile long with a shredded bark base. Bluebirds are being encouraged in this park.

5. STEPHAN FIELD AND BIRD SANCTUARY

This central village location contains picnic areas, tennis courts, batting cages, and ball fields. The Bird Sanctuary, through generous donations, is planted with many plant species which attract birds.

6. RHEINSTROM PARK

These 27 donated acres contain a very successful bluebird trail. The paved, hilly walking trail is approximately $\frac{3}{4}$ of a mile long. Some wonderful specimen trees reside in this park.

7. RADIO RANGE PARK

Enjoy the bluebirds while picnicking at this park purchased by and for the residents of Indian Hill.

8. ROWE ARBORETUM

These nine acres contain beautiful plant specimens including lilacs, crabapples, evergreens, dwarf conifers and plants with summer interest. A walking path circles through the arboretum. This is a good place to learn about new plants for your yard.

*In all your parks, please remember, take only what you need,
capture all your plants and animals on film, and tread gently on
the Earth so others may see it as you have.*
