

could be because Ava has delight-

9th Graders Tour Industry

All ninth grade boys at Hawthorne Junior High School Thursday took field trips through several Lorain Industries as part of a new program designed primarily to acquaint junior high school boys with several occupations.

Max J. Lerner, supervisor of vocation education in Lorain public schools explained: "It is the feeling of the school that students may do a better job in selecting their courses in high school and college if they have some first hand information as to actual operations performed in the many fields of work."

THE BOYS WERE divided into seven groups. Chemists chaperoned by Neil Allen, and draftsmen, chaperoned by David Beckwith, visited the National Tube Co.

Boys interested in chemical engineering, chaperoned by Myron Brown, toured the B. F. Goodrich Co. plant in Avon Lake. Lerner chaperoned boys interested in mechanical engineering who were guests of the Thew Shovel Co.

Welding operations at the Thew Shovel Co. were viewed by a group of boys chaperoned by Benjamin Fain.

D. W. BROCKELHURST accompanied a group interested in machinist operations on a tour of the American Crucible Products Co. and Richard Ackerman accompanied a group interested in electrical engineering to the Lorain Products Corp.

Similar trips will be conducted for ninth grade boys in all other junior high schools in the city before the end of the school year, Lerner said.
