

To the Honorable Board of Trustees of the Town Of Bishop.

Gentlemen.-

In as much as your honorable body has, acting under the Local Improvement Act of 1901, called for the Engineers Report, preliminary to the work of grading Main Street and constructing curb and gutters; and as said report has been presented for your consideration, we the undersigned property owners of the district to be taxed for said work do hereby petition that action on said report be delayed for a reasonable time.

In consideration of a reasonable delay of action on said report we hereby agree to do the work recommended in said report and as described in the specifications included in it, provided that the Town will pay for all engineering and inspection and construct the necessary culverts and a reasonable number of cross walks; thereby saving the cost of advertizing, clerical work and other incidentals.
