Mary DeDecker

Botanist

June 18, 1995

Dear Phyllis:

I need guidance. I have set aside some slides as habitat shot but they may not be what you want at all. I tend to be most interested in rare or endangered plants and you may want the most common species. So I've made a list for you to look over. I do have many slides of habitats showing common plants in the foreground, as well as numerous shots of the various plants. Of course I will send pictures of the dune grass as you requested.

Otherwise, if you will give me a better idea of what you are after I will try to make good choices. Shall I have them duplicated? To whom shall I send the bill? I presume there is no chance that you will be up this way to make your own choices?

Sincerely,

Mary DeDecker

2 on Mon 19th

Slides to be considered.

Eureka Valley Dunes - plants in foreground Excellent shot of dunes.
" " " North end habitat
" " " Scaevola habitat on slopes
" " " East side - Evening primrose habitat
" " " Dr. Mary examining artemisia plant
" " " East side - field of *Psiloxa pleniradiata*
with shrubs atop a *Stanleya*.
