A Despicable Act.

Some contemptible wretch poisoned little "Fly," a harmless dog and a universal favorite on account of its beauty and brightness, belonging to Mrs. Harris, wife of the editor of The Coso News, at Darwin. It seems to have been a work of pure, cowardly spite, and for that reason we allude to it. No newspaper man, however well disposed to "do unto others as he would be done by," can perform his whole duty or any reasonable part of it "without treading on some very prominent corns," as The News expresses it, and of course must now and then become the object of some bitter animosities. That is to be expected, and borne as any other inevitable little misfortune. But when for such cause some two legged cur resorts to such cowardly, cruel and ineffably mean method of "getting even" as in this instance, it

arouses a degree of indignation far beyond anything an open, manly enemy could do. It rarely happens that a dog poisoner is by nature anything better than a murderer at heart, and would commit murder if not a vindictive, constitutional, sneaking coward. The News animadverts at length upon the occurrence, and offers \$50 reward for evidence to convict the poisoner, or half that sum for good *presumptive* proof as to the guilty party.

Thinks Well of It.

Mr. J. L. Porter, of Cerro Gordo, paid a visit last week to Broder & Moffat's furnace at Log Springs. He says that in his judgment the only thing required to make the smelting of those ores as perfectly successful as any other in the county is just such knowledge of combinations—to be soon gained by experience—as is requisite for every locality, each one requiring a process somewhat special to itself. Until this is gained furnaces must bank now and then and occasion expensive delays. In short, Mr. Porter thinks no fears need be entertained as to a permanent success at Sylvania. There is abundance of good smelting ore, hard galena only being somewhat deficient in the Uncle Sam, but abundant in the district. His judgment may be relied upon. At last accounts the furnace was running steadily, though of course not turning out bars as rapidly as in low grade bullion.

In Working Order.

The preparations for the celebration at Lone Pine are now fairly established and in excellent shape. The order of exercises will be found elsewhere in this issue. The prospects are firstrate for even a greater and more satisfactory success in every essential than was at first hoped for. The race track is in the best possible condition, and that supplemental part of the celebration is likely to be eminently satisfactory to all those specially interested, the losers excepted of course. Aside from the formal ceremonies on the Fourth there is going to be some others that are certain to promote the general enjoyment a little beyond anything yet witnessed in this county.

The Courts.

We understand Judge Hannah will fix the term for the meeting of the next Grand Jury for Friday, July 7, instead of on the preceding Monday when the term commences. The reason for the postponement is good and sufficiently obvious, since the Fourth comes on Tuesday. As yet we hear nothing about the adjourned term of the District court, at which, it was said a new Judge would preside.

Notice of the "Roosters"

Ye antiquated order of "Rowdy Roosters" are anxious to hold, in solemn conclave, a council of war. Their actions are mysterious, and the members, only, are expected to read the notice in this week's issue.

For a Trip.

Jos. Fernbach starts to-day for a six-

months' visit in the East, which includes
the little show at Philadelphia of course.
