Gentlemen:-

Referring to your valued order #806 of the 16th inst., we regret to advise that our stock of the #6 and #10 Black Sable Brushes which you have ordered is completely exhausted and as it may be some time before we will be able to obtain a further supply, we have taken the liberty to substitute our #3121 Red Sable Brushes on these items and trust that under the circumstances the manner in which we have handled your order will meet with your approval.

Very respectfully,

KEUFFEL & ESSER CO. OF N.Y.  
San Francisco Branch.

**THIS INVOICE SUBJECT TO A CASH DISCOUNT OF 1 PER CENT ONLY IF PAID WITHIN 10 DAYS FROM DATE.**

TERMS—Net cash 30 days. If paid in cash ten days from date a discount of one per cent will be allowed from the amount of the invoice. Interest will be added after 30 days from date at the rate of 7 per cent per annum. Receipted freight bills covering this shipment, if sold at a delivered price, and sack credit memorandums issued by this Company will be accepted as payment on account this invoice.

The quantity of Cement herein has been counted by this Company and has been checked and receipted for by the R. R. Co. The consignee should count contents of car before it is unloaded, and, if found incorrect, should notify both the R. R. Co. and this office immediately; otherwise no claim for shortage or damage will be allowed.

This Cement is guaranteed to meet all the requirements of the Standard Specifications. Should any question arise as to the Cement, send a certified sample of ten (10) pounds of the Cement involved to some testing laboratory of repute and also a like sample to the office of the Cement Company, 2 Market Street, San Francisco.

We absolutely guarantee the Cement but will not guarantee the work.

Ten cents each will be paid for all Cloth Sacks of this Company if returned within 60 days in good condition, freight prepaid to Bay Point, Cal.

Mr. Chas. C. Climo, Sup't.,  
Cerro Gordo Mines Co.,  
Keeler, Calif.

Dear Sir:-

"Compressed Air Data" has its completion in the enclosed Section 12 and the Index of Contents of all Sections. These brochures, bound together in the loose leaf binder furnished you, will possibly be useful for future reference.

If there are any sections missing from your set, we will gladly send you additional copies if you will advise us of the section numbers to be supplied and your reservation number.

It is hoped that the information incorporated in "Compressed Air Data" has been of value to you, and we solicit your opinion as to the scope, field to be covered, subject matter, etc., for a future edition along similar lines. Your ideas will be of great value to us in guiding our future work, as we wish our editorial policy to concur with the wishes of the majority.

We thank you for the interest you have taken in "Compressed Air Data", and assure you that it is our aim to render you service in the manner you wish to be served, at present as well as in the future.

Yours very truly,

INGERSOLL-RAND COMPANY OF CAL.,

Dear Sirs:

Attached is copy of letter from the War Department,

Spruce Production Division, to our Mill City office, notifying them that they have been awarded the Honor Flag for the mill showing the greatest percentage of Fir Airplane Lumber produced during the month of August, 1918. August was the first month the production of the mills was recognized, and this award is the only one made for Fir production. We are rather proud of this distinction and take pleasure in announcing it to you.

We own and operate our own mills, railroads and steamships, cut our own timber, and have a daily capacity of one million feet of Fir, Hemlock, Spruce and Redwood. We also maintain the largest distributing Yard on the Pacific Coast at East San Pedro.

With these facilities at our command we are in position to properly serve you.

Hoping you will bear us in mind when you are in the market, and thanking you in advance for your patronage, we remain

Yours very truly,

Hammond Lumber Company.

Copy  
WAR DEPARTMENT  
SPRUCE PRODUCTION DIVISION  
UNITED STATES SIGNAL CORPS

Portland, Oregon, Sept. 14, 1918

Hammond Lumber Company,  
Mill City, Oregon

Gentlemen:

It gives me great pleasure to advise you that you have been awarded our Honor Flag for the mill showing the greatest percentage of Fir Airplane Lumber production during the month of August.

Your record is one which every mill in Oregon and Washington can well afford to aspire to, and you and your employees are to be congratulated on the splendid showing made.

It is your privilege, as well as your duty, to continue to maintain this efficiency, to the end that the demand for Airplanes, and yet more Airplanes, may be promptly and satisfactorily met.

This office is confident that if such efficiency as you and your employees have shown can be maintained and spread over other operations that our preponderating air fleet will be assured for the spring of 1919 and such preponderance will mean victory for us in that year.

I do not believe it possible to present a more convincing argument to illustrate the vital relation that you and your men have to this war.

I wish to thank you for this substantial contribution to our program.

Most cordially yours,

(Signed) BRICE P. DISQUE

Gentlemen:-

WE ARE ESTABLISHING THE LARGEST  
M A G N E S I T E  
REFINING PLANT IN THE UNITED STATES

WE WILL MANUFACTURE:

MAGNESITE CALCINED DEAD BURNED For Refractories' Purposes

MAGNESITE FERRO For Refractories' Purposes

MAGNESITE BRICK For Refractories' Furnaces

MAGNESITE CALCINED For Plastic Work

Our products are made from the Mexican Magnesite obtained from the Island of Santa Margarita, Lower California, which is recognized to be the best, whitest and most uniform Magnesite on this Continent.

WE ARE SELLING ALL these commodities, and can offer you for immediate delivery and also for contract, as stated.

Our MAGNESITE BRICK, made by the Pacific Refractories Company, have given and are giving the best satisfaction in the several Electric and Open Hearth Furnaces where they are being employed, and have stood the most extreme test.

Please let us hear from you on enclosed card.

Yours truly,

### IMPORTANT NOTICE

As a means of improving Prest-O-Lite Service to our customers, we have decided that QUICKER and more satisfactory action can be secured by having our customers mail their orders for Prest-O-Lite exchanges of all style cylinders, direct to our charging plants.

Please, therefore, from this time on, mail such orders, bills of lading and notification of express shipments direct to:

THE PREST-O-LITE COMPANY, INC.

P. O. BOX #596

LOS ANGELES, CAL.

TELEPHONE NO. EAST 151

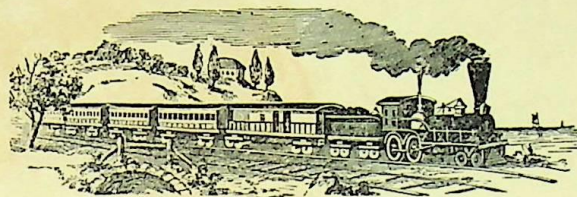

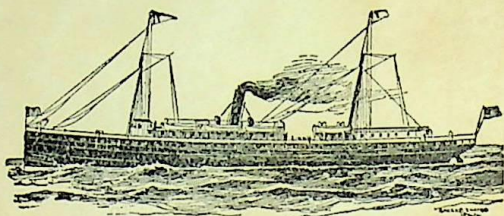

Invoices covering exchanges of welding style cylinders will be mailed you from our newly established Welding Gas Sales Offices, Kohl Building, San Francisco, Cal.; and all remittances, as well as correspondence pertaining to this branch of our business (other than exchange orders), should be sent to the San Francisco Office.

Invoices covering exchanges of auto style cylinders (A-B-E & MC) will be mailed to you from our newly established Pacific Coast General Offices at #28 Oak Street, San Francisco, Cal., and all remittances and correspondence pertaining to auto style cylinders, other than orders, should be sent to this office.

# The X. L. Boiler and Tube Compound.

For the Removal and Prevention of Boiler Incrustation and Foaming.

---

All natural waters contain more or less mineral matter, which precipitated by evaporation, form a sedimentary deposit known as *scale*: the effect of which as a non-conductor of heat, is: 1st, to necessitate the use of more fuel, and 2d, to burn and destroy the iron of the boilers and tubes.

The attention of engineers and all interested in the use of steam is called to the "X. L. Boiler and Tube Compound," which many years have proved to be the only really successful preparation for removing entirely the scale where already formed, without injury, and preventing it from forming when it does not exist, or has been removed. It also prevents the iron from pitting or oxidizing or rusting. Its use will add 35 per cent. to the life of any boiler and save from 10 to 30 per cent. of the fuel.

Briefly, some of the many advantages obtained by using The X. L. Compound, are as follows: 1st.—Full efficiency of boiler. 2nd.—Economy of fuel. 3rd.—Preventing corrosion, pitting and oxidizing. 4th.—Absolute prevention of foaming. 5th.—Decreasing Insurance. 6th.—Extending life of boiler.

DIRECTIONS FOR USING THE COMPOUND.—For Stationary Boilers, one gallon to each 15HP should be put in at the beginning of each run of two or three weeks, during which time the boiler should be blown off as seldom as possible; when convenient put in half or two-thirds of the quantity at first, adding a little each day or two till the quantity is one gallon to each 15 horse power has been used. After the scale has been removed, much less is needed to prevent its re-forming. For marine boilers with surface condensers, one gallon to each 40 horse power will be sufficient, or one gallon to each 10 tons of coal used. In most cases the scale will be removed during the first application, but in others where the scale is hard, it does not begin to move for six weeks or more. The Compound may be put in through man hole, feed pipe or safety valve. After the Compound is put in, no new scale will form and the iron will cease to rust. Before using the Compound be careful to stir it thoroughly.
