

20th April

Before I now take this for mailing must I tell, I just now come from coffee table in the yard. According to paper is it warmer in at least south of Sweden than in the Mediterranean countries.

It is like June, July. One place reg. 25 celcius

Astrid, my daughter in law, said Vallie called up last night. They had intended a visit but Maria, my oldest brothers daughter has not been feeling good so they have waited. But Signe, Astrid and I am going to Kalmar Thursday, I to the hospital for hearing and the girls probably for shopping. We will meet them ^{G. + V} then. They will come in. in such purpose.

Were you here now you could have a job. Sven (my son) is putting a third story on the house, 3 bedrooms and

water closet. He is also putting facade
tile on the whole building so the looks
will also be nice. Has previously been
firing with saw-dust but changed over
to oil last fall so as you see we are
improving all around.

Am only missing in now saying that
the ~~of~~ apples are ripe but have not ad-
vanced quite so far. Nevertheless the
trees are showing some scant buds.

Well, I have to admit that my ~~power~~
power is for the present used up.

So lang Ole
